## **EXECUTIVE SUMMARY**

### INTRODUCTION

This Municipal Service Review (MSR), prepared by the Stanislaus Local Agency Formation Commission (LAFCO), provides information about services and boundaries for Stanislaus County's fourteen fire protection districts. The report fulfills a requirement mandated by the State of California, as part of the Cortese/Knox/Hertzberg Local Government Reorganization Act of 2000 (CKH Act), to conduct a periodic review and update of Spheres of Influence for the fire protection districts.

This MSR provides an overview of the overall fire service provision structure in the County along with profiles of each of the districts that provide fire protection services. General information is included regarding city fire departments, although these agencies are studied separately and included as part of each individual city's Municipal Service Review. Lastly, the report includes the required determinations for each of the 14 fire protection districts.

### **REPORT OVERVIEW**

The following provides a summary of the information included in the report.

**CHAPTER 1 - INTRODUCTION:** This chapter describes the background of Local Agency Formation Commissions (LAFCOs) and provides an overview of the Municipal Service Review and Sphere of Influence Update requirement and process.

**CHAPTER 2 – FIRE PROTECTION SERVICES IN STANISLAUS COUNTY**: Chapter 2 provides a general summary of the fire protection system in Stanislaus County as well as an overview of the various agencies and organizational structures providing fire services. The chapter discusses how these partnerships work together to bring efficient services to the community. The various agencies include CalFire, Stanislaus Regional 9-1-1, and Modesto Junior College Regional Fire Training Facility. These services are provided by other county and state agencies and are not being reviewed as part of the Municipal Service Review. However, they are included in this chapter as they are essential to providing adequate fire services in Stanislaus County.

**CHAPTER 3 – MUNICIPAL SERVICE REVIEW (MSR):** The MSR provides a review of the fourteen fire protection districts in Stanislaus County. Included in this chapter are seven statutory determinations that must be prepared as part of the MSR. The determinations are based on a review of growth and population projections, identifying disadvantaged unincorporated communities, present and planned public facilities and services, financial figures, opportunities for shared facilities, and accountability and government structure.

**CHAPTER 4 – SPHERE OF INFLUENCE (SOI) UPDATE:** This chapter provides a brief description of state mandates requiring the SOI Update. Also included is a summary of the Stanislaus LAFCO Commission's policies on SOI Updates as well as the SOI Update process itself.

**CHAPTER 5 – FIRE PROTECTION DISTRICT PROFILES AND DETERMINATIONS:** This chapter contains a profile of each of the fourteen fire protection districts (FPDs) within Stanislaus County that provide fire protection. These Districts include the following:

| Burbank-Paradise FPD | Keyes FPD                   |
|----------------------|-----------------------------|
| Ceres FPD            | Mountain View FPD           |
| Denair FPD           | Oakdale Rural FPD           |
| Hughson FPD          | Salida FPD                  |
| Industrial FPD       | Stanislaus Consolidated FPD |

Turlock Rural FPD West Stanislaus FPD Westport FPD Woodland FPD

Each district profile contains a summary, background information, and data on district operations and boundaries. Most profiles include tables and charts outlining district formation and duties, funding sources, attributes, types of service, stations, and calls for service. A map of the District's current Sphere of Influence and boundaries are included within each district's profile.

Followed by each district profile will be the required Municipal Service Review (MSR) and Sphere of Influence Update (SOI) determinations for that respective district.

**CHAPTER 6 – REFERENCES:** This section includes works and reports referenced and individuals and agencies contacted or interviewed.

### **REPORT DESIGN AND METHODOLOGY**

For the current update, LAFCO Staff sent each of the fire districts questionnaires seeking updated information from the previous MSR, as well as any recent audits, service contracts, etc. Staff then met with representatives from each District, as well as the County Fire Warden to discuss the updated content.

Staff has also simplified the structure of the previous MSR and consolidated each district's profile with their respective determinations, allowing interested persons to obtain information more easily about an individual district.

### **KEY FINDINGS**

The following summarizes key findings of this report:

#### 1. Overlap of City Spheres of Influence on Fire Protection Districts

Stanislaus County consists of 9 incorporated cities and the remaining unincorporated County. Each city has its own fire department or has contracted with a fire protection district. Fire protection districts (FPDs) are independent agencies that each has a sphere of influence that is coterminous with its district boundary. The 9 incorporated cities have spheres of influence that, in most cases, overlap onto adjacent County FPDs. LAFCO policies have historically recognized that city spheres of influence take precedence over those of the fire districts, resulting in detachments from the district in these areas upon annexation to a city.

Future growth of cities is inevitable. Along with this growth, there is an ongoing concern from many of the County's FPDs regarding the impact of these detachments and their

associated loss of revenue from property taxes, assessments, and development fees. The impact of detachments has a greater impact on FPDs providing services to developed areas that are entirely or substantially surrounded by the sphere of influence of an existing city. This is the case with FPDs such as Burbank-Paradise FPD, Industrial FPD, Ceres FPD and Turlock Rural FPD.

On a case-by-case basis, where the impact to a fire district is significant, the Commission has approved city annexations with transitionary agreements to offset a district's loss of revenue. In rare instances, annexations without detachment have been proposed in areas where an existing city-district contract for services, where both agencies are in favor of the non-detachment. Non-detachment can cause future confusion due to overlapping jurisdictions, development fee collection, and the potential for an illogical boundary should the contract or agreement cease.

#### 2. <u>Contracts for Fire Service</u>

There has been an increase in contracts for services between fire agencies in recent years. Most notable is the City of Modesto providing services for multiple fire agencies. At this time, the City of Modesto is providing services for four fire protection districts and two cities. With districts continuing to lose territory and constraints on funding, there will likely be interest from additional agencies wanting to take advantage of potential efficiencies and cost-savings of contracting with other fire agencies.

#### 3. Fire Facilities Impact Fees (Development Fees)

The financial ability of the districts to provide services is affected by the available financial resources of the individual districts. Such revenues include property taxes, assessments, and fire facilities impact fees (also known as development fees). A number of districts currently do not collect fire facilities impact fees. These districts include Burbank-Paradise FPD, Ceres FPD, Industrial FPD, and Turlock Rural FPD.

FPDs are able to study and approve fire facilities impact fees. Such fees must also be approved by the County Board of Supervisors. These fees are collected at the time of any new development to raise revenue for construction or expansion of capital facilities that benefit the contributing development. Most development occurs within populated areas. Therefore, such development fees provide limited resources. However, collection of these fees may aid in future infrastructure and budget needs for these districts.

#### 4. Operational Challenges

Fire protection districts differ in their ability to provide sustainable services. Several districts are currently struggling to staff their fire stations, purchase/maintain equipment, and facilities, and raise revenue. As a result, service is negatively affected. In one instance, LAFCO staff was unable to make contact with a fire district. In other instances, a district may lack specific resources while a neighboring district has them readily available. These issues may continue to negatively impact service, as well as create new and unforeseen challenges.

## **RECOMMENDED ACTIONS**

#### **Recommendations for LAFCO**

- 1. For annexation applications to cities, request an analysis of the economic impact of detachment on the remaining territory of a special district to determine if there will be an adverse impact on a district's ability to provide services.
- 2. Support long-term planning efforts by the fire protection districts through identification of overlapping spheres of influence and future impacts to revenues.
- 3. Support the adoption of development impact fees for those fire protection districts that presently do not presently have such programs.
- 4. Provide technical assistance (e.g. mapping, Geographic Information System shapefiles) to those fire protection districts seeking to establish or increase benefit assessments.
- 5. Formulate a reorganization guide that includes examples of successful reorganizations or consolidations to aid fire protection districts considering options to maintain or improve long-term stability of fire service in their community.

#### **Recommendations for the Fire Protection Districts**

- 1. Engage in long-term planning, including the identification of specific areas where there is potential for annexation and/or detachment and an analysis of the financial impacts. Districts and cities should work together on mitigation strategies for territory losses.
- 2. Consider LAFCO-related options that support regionalization (including service contracts, reorganizations or consolidations) when determining how to best serve the district's customers in the long-term.
- 3. Continue partnerships and communication with adjacent fire protection districts, cities, and LAFCO.
- 4. Infrastructure and facility improvements are needed, costs continue to rise, and keeping quality staff on board has become a challenge for some the County's fire protection districts. If unmitigated, these issues could affect fire protection services for the community. Fire districts should begin exploring potential consolidations or annexations into neighboring fire districts. There may be a number of benefits resulting from this. Benefits may include reduced or stabilized costs; shared and efficient use of services, facilities and equipment, and training resources; greater staffing levels; and being more centralized. In turn, the community could benefit from better response times and services. Districts should examine what the best course of action is for the community.

#### Previous MSR Recommendations & Actions

The Commission's previously adopted MSR identified changes to State Law, most notably, SB-239 requiring LAFCO approval for qualifying fire contracts. The MSR recommended amending the Commission's Policies and Procedures to reflect those changes. As a result, the Commission amended its Policies and Procedures to describe the process for Commission review, as well identifying scenarios the Commission considers exempt from review. LAFCO

Staff also prepared an application tailored specifically for fire contracts that outlines the requirements of the new legislation for applicants.

The previous MSR also recommended that LAFCO Staff provide technical assistance to fire protection districts seeking to establish or increase benefit assessments. Since that time, LAFCO Staff has provided such technical assistance to several fire protection districts, including sharing of Geographic Information Systems information and preparation of maps to meet election requirements. Also, several districts have moved forward with impact fee studies, special assessments, and fees for services.

As recommended in the previous MSR, the districts have maintained their partnerships with adjacent fire protection districts, cities and LAFCO. New partnerships have also been established through contracts for fire services between agencies. Although no specific plans have been established, the districts continue to strategize for the future to best serve the community.

## CHAPTER 1: INTRODUCTION

This chapter describes the background of Local Agency Formation Commissions (LAFCOs), LAFCO objectives, and CKH Act requirements.

## 1.1 HISTORY OF LAFCO

The end of World War II saw California experiencing a tremendous population increase that resulted in the sporadic formation of cities and special service districts. These changes, together with increased personal mobility, related to the popularity of the automobile, created growing demands for housing, public services, and public infrastructure, often in suburban areas.

Due to the desires of some communities to capture their perceived share of new growth, annexation conflicts evolved between agencies, with some expanding their area to be in a better position to annex additional territory. The creation of new cities or special districts also occurred without any third-party review.

A general lack of coordination led to a multitude of overlapping, inefficient jurisdictional and service boundaries, and premature conversion of much of the State's productive agricultural and open-space lands. The result was urban sprawl. The outcome of land speculation and development boom became evident as more of California's agricultural land was converted to urban use. Using various small units of local government, this premature and unplanned development created inefficient and expensive systems of delivering public services.

Governor Edmund G. Brown, Sr. responded to this problem in 1958 by appointing the Commission on Metropolitan Area Problems. The Commission's responsibility was to study and make recommendations on the "misuse of land resources" and the growing complexity of overlapping local governmental jurisdictions. The Commission's recommendations on local governmental reorganization were introduced in the Legislature in 1963, resulting in the creation of Local Agency Formation Commissions, or LAFCOs, operating in each county.

#### LAFCO REGULATION OF BOUNDARY CHANGES

Beginning in 1964, local boundary changes required LAFCO approval. As a countywide regulatory authority, LAFCO's broad goals and objectives included discouraging urban sprawl, encouraging the orderly formation and development of local governments based on local circumstances, promoting efficient and economical local governments, and guiding development away from agricultural and open space resources.

LAFCO regulates by approving or denying city and special district boundary changes, forming or reorganizing local agencies, and reviewing the extension of public services. It is empowered to undertake studies of local agencies and to initiate updates to the spheres of influence. Typically, applications to LAFCO originate with an affected the affected city or district seeking to annex territory.

The Commission is an independent agency, exercising a direct grant of legislative authority from the State government. Its decisions, while subject to judicial review, are not appeal-able to the county or any other local or statewide administrative body.

#### <u>SB 239</u>

Effective January 1, 2016, State Senate Bill 239 (Hertzberg) amended Government Code Section 56134 to require LAFCO review and approval of fire protection contracts or agreements for the exercise of new or extended fire protection services outside a public agency's jurisdictional boundaries. A contract or agreement is defined as one that either transfers responsibility for more than 25% of an agency's service area or affects employment status for more than 25% of employees of an agency. Fire contracts or agreements were previously exempt from LAFCO review (as are other agreements between two entities providing like services). Mutual aid agreements are not generally subject to such review. However, any fire service contract meeting the above Section 56134 thresholds must now seek LAFCO review and approval.

## 1.2 STANISLAUS LAFCO

The Stanislaus LAFCO consists of five regular members: two members appointed by the Board of Supervisors from its own membership, two members of city councils appointed by the City Selection Committee, and one public member, appointed by the Commissioners.

There are also three alternates – one in each member category – who vote in the absence of a regular member. Commissioners are appointed to four-year terms.

The day-to-day business of the Commission, including analysis and recommendations about proposals, is the responsibility of the Executive Officer. The Commission has legal counsel for assistance.

#### **OBJECTIVES**

LAFCOs have three primary objectives, as described below:

1) To encourage the orderly formation of local governmental agencies

LAFCO reviews proposals for the formation of new local governmental agencies and changes of organization for existing agencies. Agency boundaries are often unrelated to one another and sometimes overlap, seemingly at random. This complexity of local government can lead to higher service costs to the taxpayer and general confusion regarding service jurisdictions.

2) To preserve agricultural lands

LAFCO must consider the effect that any proposal will have on existing agricultural lands. By guiding development toward vacant urban land and away from agricultural preserves, LAFCO assists with the preservation of our valuable agricultural resources.

3) To discourage urban sprawl

Urban sprawl can best be described as irregular and disorganized growth occurring without apparent design or plan. This pattern of development is characterized by the inefficient delivery of important urban services (fire, police, sewer, drainage & water), and the unnecessary loss of agricultural land. By discouraging sprawl, LAFCO discourages the misuse of land resources and promotes a more efficient system of local governmental agencies.

## 1.3 MUNICIPAL SERVICE REVIEW REQUIREMENT

The Cortese/Knox/Hertzberg Local Government Reorganization Act of 2000 Act (CKH Act) requires the Local Agency Formation Commission (LAFCO) to update the spheres of influence (SOI) for all applicable jurisdictions in the County as needed. A sphere of influence is defined by Government Code 56076 as "...a plan for the probable physical boundary and service area of a local agency, as determined by the Commission." The Act further requires that a municipal service review (MSR) be conducted prior to or, in conjunction with, the update of a sphere of influence (SOI).

The legislative authority for conducting a municipal service review is provided in Government Code Section 56430 of the CKH Act. The Act states, that "in order to prepare and to update spheres of influence in accordance with Section 56425, the commission shall conduct a service review of the municipal services provided in the county or other appropriate area..." The MSR must have written determinations that address the following factors:

#### SERVICE REVIEW FACTORS TO BE ADDRESSED

- 1. Growth and population projections for the affected area
- 2. The location and characteristics of any disadvantaged, unincorporated communities within or contiguous to the sphere of influence
- 3. Present and planned capacity of public facilities and adequacy of public services, including infrastructure needs or deficiencies including needs or deficiencies related to sewers, municipal and industrial water, and structural fire protection in any disadvantaged, unincorporated communities within or contiguous to the sphere of influence
- 4. Financial ability of agencies to provide services
- 5. Status of, and opportunities for, shared facilities
- 6. Accountability for community service needs, including governmental structure and operational efficiencies
- 7. Any other matter related to effective or efficient service delivery, as required by commission policy

State Guidelines and Commission policies encourage cooperation among a variety of stakeholders involved in the preparation of a Municipal Service Review. The document will analyze the existing and future services for the Fire Protection Districts in Stanislaus County. The MSR may consider various alternative government structures for efficient service provision. LAFCO is <u>not</u> required to initiate any boundary changes based on the service review. However, LAFCO, other local agencies (including cities, special districts, and the county), or the public may subsequently use the service reviews, together with additional research and analysis to pursue changes in jurisdictional boundaries.

## 1.4 SPHERE OF INFLUENCE UPDATE PROCESS

The purpose of a sphere of influence is to encourage the "logical and orderly development and coordination of local government agencies so as to advantageously provide for the present and future needs of the county and its communities." A sphere of influence serves a similar function in LAFCO determinations as general plans do for cities and counties. Consistency with the adopted sphere of influence is critical, and a change to the sphere requires careful review. The Commission emphasizes that the sphere of influence is a planning tool and the establishment of a sphere of influence, or the inclusion of territory within a sphere of influence of an existing governmental entity, does not automatically mean that the area is being proposed for annexation or development.

A special district is a government agency that is required to have an adopted sphere of influence. Section 56425(g) of the CKH Act calls for Spheres of Influence to be reviewed and updated every five years, as necessary. Stanislaus LAFCO processes the Service Review and Sphere of Influence Updates concurrently to ensure efficient use of resources. For rural special districts, which do not have the typical municipal level services to review, this Service Review will be used to determine what type of services the district is expected to provide and the extent to which they are actually able to do so. The sphere of influence will delineate the service capability and expansion capacity of the agency, if applicable.

In determining a sphere of influence (SOI) of each local agency, the Commission shall consider and prepare determinations with respect to each of the following factors, pursuant to Government Code Section 56425:

- 1. The present and planned land uses in the area, including agricultural and open-space lands.
- 2. The present and probable need for public facilities and services in the area.
- 3. The present capacity of public facilities and adequacy of public services that the agency provides or is authorized to provide.
- 4. The existence of any social or economic communities of interest in the area if the commission determines that they are relevant to the agency.
- 5. For an update of a sphere of influence of a city or special district that provides public facilities or services related to sewers, municipal and industrial water, or structural fire protection, the present and probable need for those public facilities and services of any disadvantaged unincorporated communities within the existing sphere of influence.

## CHAPTER 2: FIRE PROTECTION SERVICES IN STANISLAUS COUNTY

The fire services system in Stanislaus County, as is the case in most counties in California, is a complex mix of municipal agencies, fire protection districts, and various forms of State fire protection. The following points provide a general overview of the fire protection system in Stanislaus County.

## 2.1 AUTHORITY

Fire Protection Districts (FPDs) are special districts organized under Section 13800 et seq. of the Government Code, known as the Fire Protection District Law of 1987. This section of the law was originally enacted in 1923, with the Legislature finding that fire protection services, rescue services, and emergency medical services are critical to the public peace, health, and safety of the State. The Legislature emphasized that, "local control over the types, levels, and availability of these services is a long-standing tradition in California which the Legislature intends to retain."

## 2.2 BACKGROUND

Most of the fire districts in Stanislaus County were formed in the early 1940s as a result of communities coming together under a mutual fire insurance program and identifying the need to become formally organized. In addition to the fire protection districts, several of the incorporated cities within Stanislaus County have their own fire departments, in which a greater urban-type service level is provided.

The districts were created as a result of communities becoming more populated and local individuals identifying the need to provide some form of organized fire service in rural areas. Throughout California there are many areas in which cities have grown and encroached into what was previously agricultural land. Stanislaus County is similar to other areas; in that it is experiencing the same development pressures.

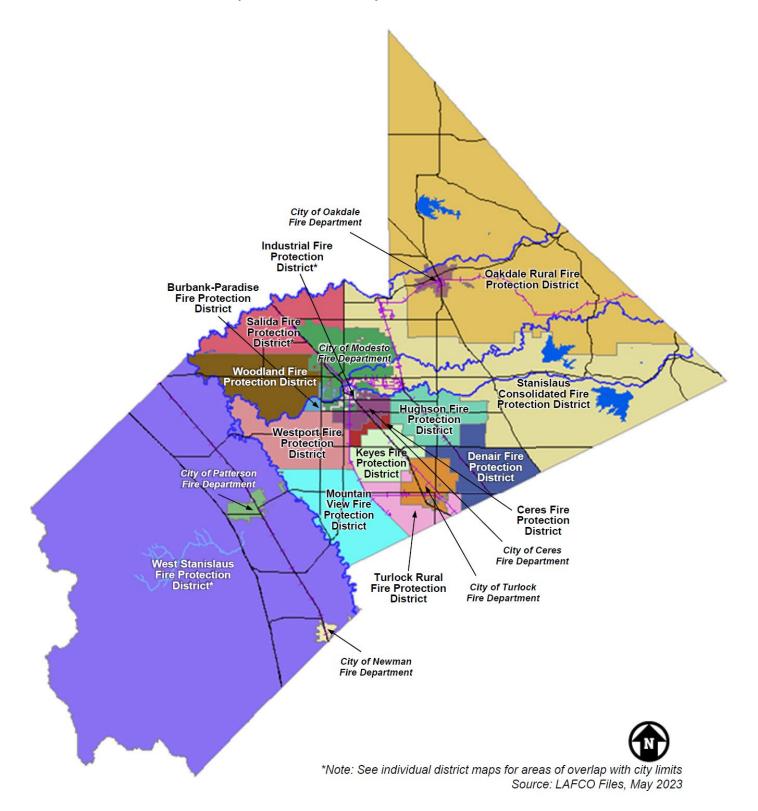

The fire protection districts are independent districts and are not part of the County government structure. They continue with their historic governance model, while simultaneously having to cope with reduced area and associated property tax revenue to provide financial support. This is creating a jigsaw puzzle of level of service and a commensurate variance exists in the level of funding to provide basic services.

The following figure illustrates the dates for the formation of the fire protection districts involved in the study. Many of these districts were originally formed as volunteer entities prior to being formally organized under the Fire Protection District Law.

|                      | Date   |                             | Date   |
|----------------------|--------|-----------------------------|--------|
| District             | Formed | District                    | Formed |
| Burbank-Paradise FPD | 1942   | Oakdale Rural FPD*          | 1945   |
| Ceres FPD*           | 1930   | Salida FPD*                 | 1942   |
| Denair FPD           | 1959   | Stanislaus Consolidated FPD | 1995   |
| Hughson FPD          | 1915   | Turlock Rural FPD           | 1958   |
| Industrial FPD*      | 1950   | West Stanislaus FPD         | 1935   |
| Keyes FPD            | 1943   | Westport FPD                | 1962   |
| Mountain View FPD    | 1943   | Woodland Avenue FPD         | 1946   |

### Figure 1: List of Fire Protection Districts (FPD) & Formation Dates

\* Fire service is provided entirely by another service provider through a contract. Service for Ceres FPD, Industrial FPD, Oakdale Rural FPD, and Salida FPD are being provided by the City of Modesto.

## 2.3 SUPPORT AGENCIES

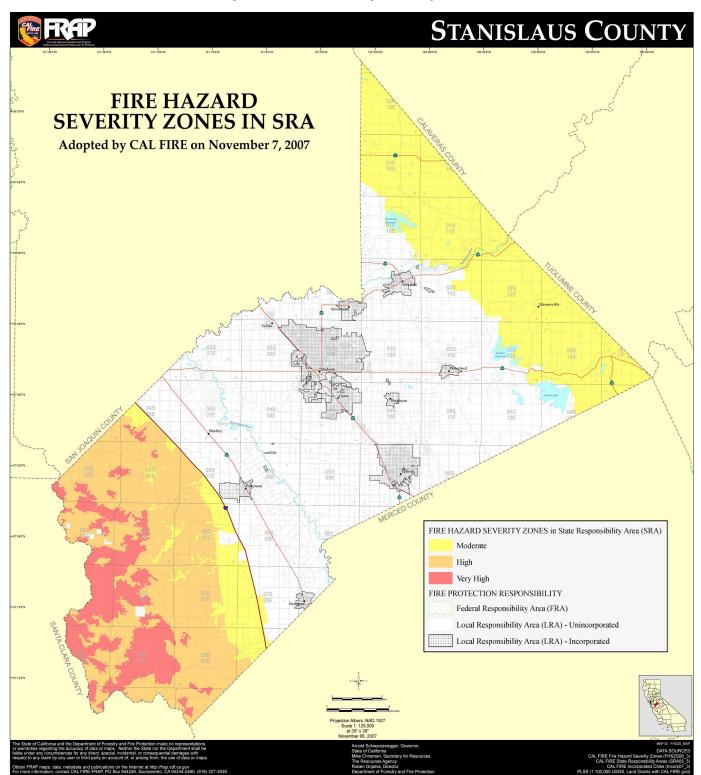

It is important to note that the current fire service delivery system has produced excellent examples of how cooperative efforts can provide for a better use of resources. There are several examples worthy of description: California Department of Forestry (CalFire); Office of Emergency Services / County Fire Warden's Office; Stanislaus Regional 9-1-1 (JPA); and the Modesto Junior College Regional Fire Training Center. These services are provided by other County and State agencies and are not being reviewed as part of the Municipal Service Review. However, they are included in this chapter as they are essential to providing fire services in Stanislaus County.

#### CALIFORNIA DEPARTMENT OF FORESTRY (CALFIRE)

The California Department of Forestry (CalFire) provides service within State Responsibility Areas (SRAs), predominantly wild land and open-space areas within the County, and is also part of countywide mutual aid, with specific automatic aid agreements. Map 2 on the following page illustrates CalFire's SRAs and the fire hazard severity zones within these areas.

Map 2: CalFire State Responsibility Areas

#### OFFICE OF EMERGENCY SERVICES / COUNTY FIRE WARDEN

The Office of Emergency Services is responsible for coordinating local emergency responses that exceed the day-to-day level within Stanislaus County. Through the Director of Emergency Services (County Chief Executive Officer) and Assistant Director of Emergency Services (County Fire Warden), OES ensures compliance with emergency management mandates from the State government based on the California Code of Regulations which established the Standardized Emergency Management System (SEMS).

The County's Fire Warden is the liaison between local fire agencies and County departments. The Fire Warden's Office provides assistance to fire districts with financial issues including development impacts, revenue projections, budget analysis, fees and assessments, and represents County fire agencies on various communication committees and workgroups.

The Fire Warden also acts as the Fire and Rescue Operational Area Coordinator (OAC) for Stanislaus County. As the Fire and Rescue OAC, the Fire Warden is responsible for the planning, coordination and deployment of mutual aid resources within the Stanislaus Operational Area and for the State Office of Emergency Services fire and rescue resources located in Stanislaus County. The OAC is responsible for maintaining several local, state, and federal databases that validate certifications, maintains an inventory of personnel and apparatus, provides training, and coordinates statewide deployment of local fire resources.

#### STANISLAUS REGIONAL 9-1-1

Stanislaus Regional (SR) 9-1-1 was formed through a Joint Powers Agreement (JPA) between Stanislaus County and the City of Modesto and is directed by a Commission composed of representatives from each participating jurisdiction and the public safety agencies.

SR 9-1-1 provides twenty-four hours a day, seven days a week public safety emergency dispatch service and is the answering point for the 911 telephone system. Dispatching is provided for 22 Fire and Law Enforcement agencies within Stanislaus County. Enhanced 911 and non-emergency call processing is provided for the unincorporated county areas and most of the area cities. SR 9-1-1 does not currently provide fire dispatch services for the City of Turlock. In addition, law dispatch services are not provided by SR 9-1-1 to the cities of Ceres, Oakdale, Newman, and Turlock.

On November 18, 2015 the Consolidated Emergency Dispatch Agency Commission and Dispatch Advisory Board voted to adopt a new Cost Allocation Methodology for use beginning in Fiscal Year 2016-2017. The new methodology is intended to address cost apportionment issues identified in a recent study and provide a simplified calculation that more appropriately ties costs to service levels provided to each participating discipline/agency.

On October 12, 2021, the City of Modesto approved a resolution authorizing the City Manager to provide the Consolidated Emergency Dispatch Agency Commission with written notice of an intent to terminate the joint exercise of powers agreement between the City of Modesto and Stanislaus County for Emergency Dispatch Service effective January 1, 2024. The decision was made to allow the City of Modesto the opportunity to explore additional opportunities in providing the service. It is unclear what impact this will have on fire protection services.

#### MODESTO JUNIOR COLLEGE REGIONAL FIRE TRAINING FACILITY

The Modesto Junior College (MJC) Regional Fire Training Center (RFTC) operates under a unique partnership with the Yosemite Community College District (Modesto Junior College), the City of Modesto, and the County of Stanislaus.

Located at 1220 Fire Science Lane, across Carpenter Road from Modesto Junior College's West Campus, the MJC Regional Fire Training Center is a training facility designed to give realistic training to pre-service and in-service firefighters for a network of Fire Agencies Partners located in Stanislaus & San Joaquin County.

The Center was constructed at a cost of 5.4 million dollars. The center includes many important features that would not have been possible if not for the partnership approach, and many unique challenges have been overcome to make this center a reality. The Modesto Junior College Fire Science curriculum prepares the student for a career in the fire service. The program is designed to teach students about the organization and operation of the fire service, proper use of fire equipment, tactics and strategies of firefighting, specialized job skills and management techniques.<sup>1</sup> The Regional Fire Training Center offers a wide range of fire service specific classes which include:

- 1. A State Fire Marshal Accredited Fire Academy
- 2. State Fire Training Certified Courses
- 3. Emergency Medical Technician Certification Classes

Photo Source: Regional Fire Training Center

#### MODESTO REGIONAL FIRE AUTHORITY (MRFA)

In 2011, a Joint Powers Agreement (JPA) between the City of Modesto, County of Stanislaus and the Salida Fire Protection District was formed and known as the Modesto Regional Fire Authority (MRFA). The JPA was created in response to the significant challenges facing fire and emergency service providers in Stanislaus County and with a visionary perspective to become a model for delivering regional services. The partners came together to evaluate and recommend options to deliver more efficient and effective fire and life safety services and emergency management. However, in July 2014, the participating agencies mutually agreed to return to their respective governance models. The challenges of the JPA included governance, financial/fiscal support, and the loss of recognizing the importance of local control.

## CHAPTER 3: MUNICIPAL SERVICE REVIEW

The Cortese/Knox/Hertzberg Local Government Reorganization Act of 2000 Act (CKH Act) requires that LAFCO prepare specific written determinations based on information and evidence presented. These determinations, as follows, were recently amended to include the consideration of disadvantaged unincorporated communities<sup>2</sup> within or contiguous to the sphere of influence of an agency.

#### SERVICE REVIEW FACTORS TO BE ADDRESSED

- 1. Growth and population projections for the affected area
- 2. The location and characteristics of any disadvantaged, unincorporated communities within or contiguous to the sphere of influence
- Present and planned capacity of public facilities and adequacy of public services, including infrastructure needs or deficiencies including needs or deficiencies related to sewers, municipal and industrial water, and structural fire protection in any disadvantaged, unincorporated communities within or contiguous to the sphere of influence.
- 4. Financial ability of agencies to provide services
- 5. Status of, and opportunities for, shared facilities
- 6. Accountability for community service needs, including governmental structure and operational efficiencies
- 7. Any other matter related to effective or efficient service delivery, as required by commission policy

State Guidelines and Commission policies encourage cooperation among a variety of stakeholders involved in the preparation of a Service Review. This Service Review will analyze the existing and future services for the Rural Fire Protection Districts in Stanislaus County as well as provide a basis to evaluate, and make changes to the Spheres of Influence, if appropriate.

<sup>&</sup>lt;sup>2</sup> Government Code Section 56033.5 defines "disadvantaged unincorporated community" as inhabited territory (12 or more registered voters), or as determined by commission policy, with an annual median household income that is less than 80% of the statewide annual median household income.

# 3.1 GROWTH AND POPULATION PROJECTIONS FOR THE AFFECTED AREA

#### LOCATION AND SIZE

The current population of Stanislaus County is estimated to be 552,878 according to the Stanislaus Council of Governments (StanCOG). An estimated 111,593 residents live within areas serviced by County rural fire protection districts. From 2010 to 2020, the total population in Stanislaus County grew by approximately 38,400 (approximately 7 percent). During this same time, the population of Stanislaus County unincorporated communities grew by approximately 1,357 (1 percent).<sup>3</sup>

The population in Stanislaus County is forecasted to increase from 552,878 in 2020 to approximately 670,411 in 2046. This prediction is a population increase of approximately 118,000. Forecasts for the unincorporated communities of Stanislaus County estimate an increase in population from roughly 112,000 in 2020 to approximately 126,000 in 2046.<sup>4</sup> This represents a population increase of approximately 14,000.

| City                       | 2020    | 2046    | 2020-2046<br>Change |
|----------------------------|---------|---------|---------------------|
| Modesto                    | 218,464 | 255,540 | 17%                 |
| Turlock                    | 72,740  | 93,571  | 29%                 |
| Ceres                      | 49,302  | 60,314  | 22%                 |
| Riverbank                  | 24,865  | 36,409  | 46%                 |
| Patterson                  | 23,781  | 34,168  | 44%                 |
| Oakdale                    | 23,181  | 28,185  | 22%                 |
| Newman                     | 12,351  | 14,686  | 19%                 |
| Waterford                  | 9,120   | 10,962  | 20%                 |
| Hughson                    | 7,481   | 10,260  | 37%                 |
| Unincorporated             | 111,593 | 126,316 | 13%                 |
| Stanislaus<br>County Total | 552,878 | 670,411 | 21%                 |

#### Figure 2: 2046 Demographic Forecasts (by Local Jurisdictional)

#### AREAS OF EXPECTED GROWTH

Based on population projections and city and County general plan policies, the majority of growth is expected to occur in the nine cities. This will increase demand for services in the Hughson, Stanislaus Consolidated, and West Stanislaus Fire Protection Districts, in addition to the city fire departments in Ceres, Modesto, Newman, Patterson and Turlock.

<sup>&</sup>lt;sup>3</sup> 2022 Regional Transportation Plan: Sustainable Communities Strategy, Stanislaus County, Stanislaus Council of Governments, August 2018.

<sup>&</sup>lt;sup>4</sup> 2022 Regional Transportation Plan: Sustainable Communities Strategy, Stanislaus County, Stanislaus Council of Governments, August 2018.

The following unincorporated communities are guided by community plans and are expected to experience future growth. The majority of urban services in these communities are provided by special districts, which provide services such as sewer and water systems that are necessary to accommodate development:

- Denair, Diablo Grande, Keyes and Salida
- Affected fire protection districts: Denair, Keyes, Salida, and West Stanislaus

The following unincorporated communities are only expected to experience minor infill growth, as the necessary public systems are either at capacity or non-existent:

- Crows Landing, Del Rio, East Oakdale, Grayson, Knights Ferry, La Grange, Valley Home, and Westley
- Affected fire protection districts: Oakdale Rural, Salida, Stanislaus Consolidated, and West Stanislaus

Currently, there are fourteen fire protection districts in multiple areas throughout different unincorporated areas of the County, each serving a different community and varying in population. The following figure illustrates the population estimates for each fire protection district.

| District             | Population | District                    | Population |
|----------------------|------------|-----------------------------|------------|
|                      |            |                             |            |
| Burbank-Paradise FPD | 6,869      | Oakdale Rural FPD           | 12,147     |
| Ceres FPD            | 1,928      | Salida FPD                  | 19,819     |
| Denair FPD           | 7,336      | Stanislaus Consolidated FPD | 46,229     |
| Hughson FPD          | 10,673     | Turlock Rural FPD           | 4,771      |
| Industrial FPD       | 12,947     | West Stanislaus FPD         | 9,434      |
| Keyes FPD            | 6,341      | Westport FPD                | 2,534      |
| Mountain View FPD    | 2,800      | Woodland Avenue FPD         | 5,732      |

#### Figure 3: Population Figures for Fire Protection Districts

Source: LAFCO estimates using 2021 Census Data and Stanislaus Office of Emergency Services information

Fire protection districts are formed to provide fire protection services, rescue services, emergency medical services, hazardous material emergency response services, ambulance services, and other services relating to the protection of lives and property, public peace, health, and safety.

## 3.2 THE LOCATION AND CHARACTERISTICS OF ANY DISADVANTAGED UNINCORPORATED COMMUNITIES WITHIN OR CONTIGUOUS TO THE SPHERE OF INFLUENCE

Section 79505.5 of the California State Water Code defines a disadvantaged community as a community with an annual median household income (AMI) that is less than 80 percent of the statewide AMI. Section 56033.5 of the CKH Act further defines a disadvantaged unincorporated community as inhabited territory (12 or more registered voters) meeting the criteria above, as determined by the Commission.

Each fire protection district includes a wide area of territory encompassing many communities. Figure 4 identifies the disadvantaged unincorporated communities within Stanislaus County and the fire, water, and sewer districts they are each within, as applicable.

Generally, the disadvantaged unincorporated communities identified are older neighborhoods, established prior to modern development standards requiring that infrastructure be installed. The identification of these disadvantaged unincorporated communities does not necessarily reflect the position of the fire protection district providing the service. Though it may have some effect on the service being provided; for example, if an identified community has limited water supply, it could have an impact on the fire protection district's ability to provide services.

| Name   | General Location  | Fire Service                                      | Water Service  | Sewer Service  |
|--|---|---|--|--|
| Riverdale<br>Park Tract                            | Southwest of Modesto, within Modesto SOI                                      | Burbank-Paradise<br>FPD                           | Riverdale Park Tract<br>Community Services<br>District | Private / on-site<br>systems   |

## 3.3 PRESENT AND PLANNED CAPACITY OF PUBLIC FACILITIES, ADEQUACY OF PUBLIC SERVICES, AND INFRASTRUCTURE NEEDS OR DEFICIENCIES RELATED TO SEWERS, MUNICIPAL AND INDUSTRIAL WATER, AND STRUCTURAL FIRE PROTECTION IN ANY DISADVANTAGED, UNINCORPORATED COMMUNITIES WITHIN OR CONTIGUOUS TO THE SPHERE OF INFLUENCE.

The Districts are authorized to provide the functions or classes of services (e.g. structural fire protection services) as identified in this report. FPDs do not provide sewer or municipal water. These services are provided through other special districts throughout the County or by way of private systems. Due to recent changes in the Cortese-Knox-Hertzberg Act, the Districts would have to seek LAFCO approval to exercise other latent powers (i.e. services) not currently provided.

Fire service in Stanislaus County is a mix of municipal agencies, fire protection districts, and various forms of State fire protection. Currently, there are 14 special districts that provide fire protection services in the unincorporated areas of Stanislaus County. They are funded from their own tax bases. Four of the 14 districts have their fire service provided entirely by another service provider through a contract. The four districts include the following:

#### Figure 5: Fire Protection Districts Operating with Agreements

| District   | Service Provider                    |
|--|-------------------------------------|
| Industrial Fire Protection District              | City of Modesto                     |
| Ceres Fire Protection District                   | City of Modesto*                    |
| Oakdale Rural Fire Protection District           | City of Modesto*                    |
| Salida Fire Protection District                  | City of Modesto                     |
| *City of Modesto also provides fire services for | the City of Oakdale & City of Ceres |

Aside from districts, Stanislaus County has recently seen an increase in agreements for fire services between cities and districts. Since the previous MSR, the City of Modesto began providing fire protection services to the City of Oakdale (in 2019) and City of Ceres (in 2021). The City of Modesto is also providing administrative services to the City of Turlock and the Stanislaus Consolidated Fire Protection District. A timeline of various agreements that have occurred since the previous MSR and required LAFCO review is discussed below.

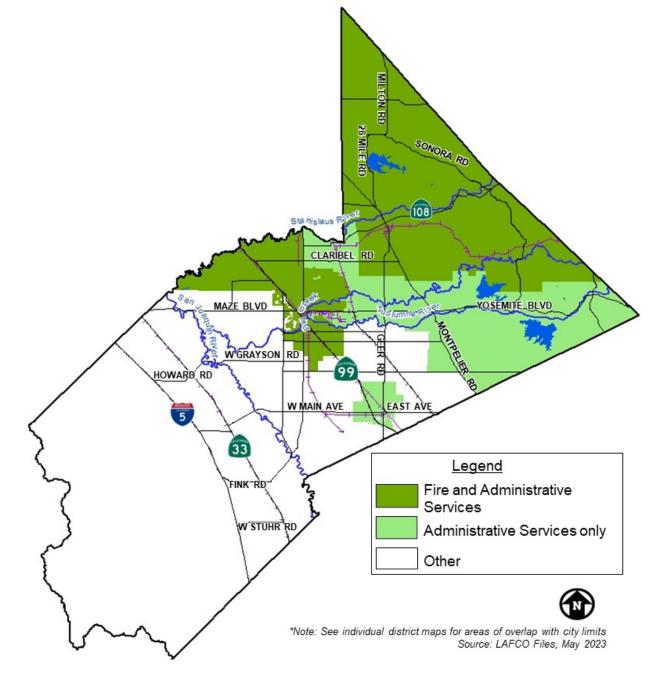

The City of Oakdale and Oakdale Rural Fire Protection District ("District) were previously contracted with the Stanislaus Consolidated Fire Protection District. That contract expired on June 30, 2019. The City of Oakdale and the District subsequently negotiated an agreement with the City of Modesto that currently provides fire protection and additional related services to the areas.

In March of 2021, the City of Ceres began comparing costs between its existing fire department services and a proposal by the City of Modesto. As a result, the City of Modesto entered into an agreement and cost plan to provide fire protection and related services City of Ceres. The agreement also included the Ceres Fire Protection District and Industrial Fire Protection District (contracted areas of the City of Ceres).

In May of 2022, the Salida Fire Protection District authorized staff to explore fire service

agreements. Discussions began between the District and the City of Modesto for the City to provide fire protection and related services within the District's boundaries. In September of 2022, the City of Modesto submitted an application to LAFCO to provide said services to the Salida Fire Protection District area. The application was subsequently approved. Map 3 illustrates those areas of Stanislaus County that currently have a contract with the City of Modesto for fire services and/or administrative services.

Fire Protection Districts offer a number of services to the community. These services include but are not limited to; fire suppression, rescue services, fire prevention, hazardous materials response, emergency medical service. A detailed description of services provided by each individual Fire Protection District can be found in Chapter 5 which provides individual District Profiles.

In addition to individual agency capabilities, there are several systems or subsystems in place within the County that support the operations of the fire delivery system and/or provide enhanced levels of service. They include the following:

- A countywide mutual aid agreement in which any agency can request general or specialized services from another agency in the County
- Agency automatic aid agreements in which neighboring jurisdictions drop their boundaries and practice closest unit response
- Emergency communications through the Stanislaus Regional 9-1-1 Center
- Emergency medical services are provided through an integrated system utilizing both public and private resources. Fire agencies provide basic life support (BLS) response, with some offering paramedic-level service without transport capabilities. Advanced life support (ALS) and transport services are provided by private vendors as well as Oak Valley Hospital District, Del Puerto Health Care District, and Westside Ambulance, which are special district governmental agencies

#### LEVELS OF SERVICE AMONG THE FIRE PROTECTION DISTRICTS

Level of service is the method by which most fire agencies are evaluated. Level of service assesses an agency's ability to provide adequate resources to mitigate events. In order to understand the effectiveness of a fire department, the delivery system needs to be defined in terms that can be measured. Level of service is primarily defined as the resources needed to meet an organization's stated service level objectives. Level of service is defined only in terms of what is provided, not in terms of effectiveness and efficiency in dealing with any specific emergency.

In general, the level of service provided is described by the characteristics of the agency providing service. This includes the idea that an adequate number of personnel are placed on an adequately designed and equipped piece of fire apparatus; and they are deployed to arrive at the scene of an emergency in a timely fashion to remove the hazards, reduce the danger, or stop the emergency from progressing any further.

Level of service is measured by response time goals along with the types and the nature of the service being provided. For example, providing two firefighters to the scene of a medical emergency within 10 minutes with 90 percent reliability is one level of service. To provide four firefighters in five minutes with an 80 percent reliability is another. Levels of service can be modified up or down depending upon the availability of resources, deployment patterns, staffing, and other factors. This is normally called the Standards of Cover (SOC).

The SOC concept is simply that fire protection resources need to be distributed in a community based on risks, hazards, and values; and furthermore, they should be able to respond in a timely fashion to prevent a small fire from becoming a larger one. This involves the ability to concentrate resources, especially staffing, to be able to perform the job in a safe and effective manner on significant events.

It should be noted that the level of service is ultimately dictated by the community(s) being served. More specifically, a level of service is commensurate and often times determined by the revenue received. A fire department may desire to provide a higher level of service, yet is unable to do so in an effort to maintain a balanced budget.

Based on definitions provided in LAFCO's 2016 Countywide Fire Services Municipal Service Review, Figure 6 indicates a Level of Service for each of the fire protection districts. These are defined as follows:

**No Service:** No response is available for the area.

**Wildland Level of Service (W):** A fire company equipped to handle wildland events will arrive within 30 minutes of travel time to intervene. There is no limit on the number of total resources that will ultimately be deployed, nor is there an expectation of the time required to complete the deployment. Generally, this is any rural area not readily accessible by a public or privately maintained road.

**Frontier Level of Service (F):** A fire company equipped to handle basic all-risk emergencies will arrive within 15 minutes of travel time. There is no expectation that the deployment of these resources will result in confining fires to the area of origin, but that the response will result in preventing the fire from spreading from the building to origin to exposures.

**Rural Level of Service (R):** A fire company equipped to handle basic structural fires and other related emergencies will arrive within 15 minutes of travel time, accompanied with other vehicles to sustain a fire flow of 500 gallons per minute (gpm) for a minimum of one hour. There is an expectation that the deployment will result in confining the fire to the room of origin, if the fire has not gone to flashover prior to arrival of the response. This level of service is the basic reason the Insurance Services Office (ISO) created its ISO 8B category. Generally, this is an unincorporated or incorporated area with a total population less than 10,000 people, or with a population density of less than 1,000 people per square mile.

**Suburban Level of Service (S):** A fire company equipped to handle all risk emergencies will arrive within five to six minutes of travel time, 80 percent of the time, and be able to generate a fire flow for 2,000 square foot occupancy for one hour. There is an expectation that the deployment will confine most fires to the room of origin. Generally, this is an incorporated or unincorporated area with a population of 10,000 to 29,999 or any area with a population density of 1,000 to 2,000 people per square mile.

**Urban Level of Service (U):** A fire company equipped to handle all risk emergencies will arrive within five minutes of travel time, 90 percent of the time, and be able to generate adequate fire flow for the designated risk level in the area. There is an expectation that the response will confine most fires to the room of origin. Generally, this is an incorporated or unincorporated area with a population of over 30,000 people and a population density over 2,000 people per square mile.

| <b>District</b>  | Type of Service | District                | Type of Service |
|------------------|-----------------|-------------------------|-----------------|
| Burbank-Paradise | W/F/R/S         | Oakdale Rural           | R               |

#### DISTRICT STAFFING

There are several different staffing configurations available for a fire agency to deploy. They generally consist of three specific types of staffing resources:

**All-Volunteer**: A staffing configuration that is entirely dependent on the response of individuals that are properly equipped and trained to function as firefighters but receive no regular compensation for providing a level of service.

**Combination**: A staffing configuration that is dependent on individuals that are on-duty as well as supported by a volunteer/reserve force. They are properly equipped and trained to function as firefighters.

**All-Fulltime**: A staffing configuration that is dependent on individuals being on-duty, properly equipped, and trained to function as firefighters who are compensated for providing the level of service.

Fire agencies, due to the amount of money that is available, often utilize a combination of ways and means of using these three types of personnel resources. A fire agency can only afford the

level of service that its funding allows. Based on these definitions, each fire agency in this study has been given a staffing description which is shown as in the following figure.

|                             | <u>Total</u>    |                  |                  |                  |
|-----------------------------|-----------------|------------------|------------------|------------------|
| <u>District</u>             | <u>Staffing</u> | <u>Full-Time</u> | <u>Volunteer</u> | Type             |
| Burbank-Paradise FPD        | 28              | 0                | 28               | Volunteer        |
| Ceres FPD                   | 0               | 0                | 0                | (Contracted Out) |

#### INSURANCE SERVICES OFFICE (ISO) RATINGS

The Insurance Service Office (ISO) is an independent organization that serves insurance companies, fire departments, insurance regulators and others by providing information about fire risk. ISO staff collects information about fire protection efforts in communities throughout the United States. ISO assigns a Public Protection Classification (PPC) number from 1 to 10. Class 1 represents exemplary fire protection and Class 10 indicates that the area's fire suppression program does not meet ISO's minimum criteria. There are three primary factors considered in the development of the rating: the fire alarm and communications systems (10%); the fire department (50%); and the water supply system (40%). A community's risk reduction efforts can allow for extra credit of up to 5.5 points for a potential total of 105.5. That takes into account fire prevention code adoption and enforcement, public fire safety education, and fire investigation.<sup>5</sup>

<sup>&</sup>lt;sup>5</sup> ISO Mitigation Website

The following figure reflects the ISO rating for each fire agency in Stanislaus County:

| Fire Protection District    | ISO Rating | City Department | ISO Rating |
|-----------------------------|------------|-----------------|------------|
| Burbank-Paradise FPD        | 4/5        | Ceres           | 3          |
| Ceres FPD                   | N/A        | Modesto         | 2          |
| Denair FPD                  | 2/2Y       | Newman          | 04/4Y      |
| Hughson FPD                 | 3/3Y       | Oakdale         | 3          |
| Industrial FPD              | N/A        | Patterson       | 2/2Y       |
| Keyes FPD                   | 4          | Turlock         | 2          |
| Mountain View FPD           | 8/10       |                 |            |

#### Figure 8: ISO Ratings by Fire Agency

#### DISADVANTAGED UNINCORPORATED COMMUNITIES

The CKH Act requires the identification of DUCs that are within a studied district or contiguous to its boundaries. As identified in Section 3.2, there are currently 14 Disadvantaged Unincorporated Communities (DUCs) throughout Stanislaus County and each are within a Fire Protection District (FPD). All 14 DUCS are within seven FPDs and include the following: Burbank-Paradise FPD, Industrial FPD, Keyes FPD, Stanislaus Consolidated FPD, Westport FPD, West Stanislaus FPD, and Woodland Avenue FPD.

Like all communities, DUCs necessitate sewer, water, and fire protection services. These services are essential to any community for health, safety and wellbeing. Generally, the DUCs identified above are older neighborhoods, established prior to modern development standards requiring that infrastructure be installed.

FPDs do not provide sewer or municipal water. These services are provided by other special districts throughout the County, by contract with existing municipal providers, or by way of private systems as identified previously in Figure 4.

#### PROPOSED FACILITIES AND INFRASTRUCTURE

Whether it is an addition to a building, remodel, or new equipment, there is a need for updated and additional facilities with many of the FPDs. Needed improvements are described in the "determinations" section of each FPD profile.

Although districts may receive revenues to support operations, improvements or new equipment are usually not included as part of a District's yearly budget. New or improved facilities and equipment typically require a special tax assessment or funding source to come to fruition.

## 3.4 FINANCIAL ABILITY OF AGENCIES TO PROVIDE SERVICES

Unlike cities and counties that are granted broad powers of taxation as general purpose governments under the State Constitution, special districts are limited to revenue sources authorized by the legislature. Each of the Stanislaus County fire protection districts is an autonomous unit of local government with sovereignty over internal fiscal issues, although they are restricted to specific revenue sources by State law. As a result, the Districts primarily rely on property tax, special assessments, fees for service, and development fees for their revenues.

#### PROPERTY TAXES

The major funding source for fire districts is property tax revenue. Each local government agency shares a portion of this revenue based on an established percentage or allocation factor. Stanislaus County fire districts receive 20 to 100 percent of their revenue from their share of property taxes and their assessments.

Property tax revenues are impacted by property values, development, as well as the resale of land. Areas where there are high property values generally yield higher property taxes. Some communities are more recently developed and have high-value homes and businesses, while others have older properties and/or sparse development. Differences in the extent and value of land development affect the amount of property tax revenue a community generates. Market forces, natural geography, and local land use choices act together to create diversely valued communities.

#### SPECIAL TAX REVENUE

Additional taxes or assessments require voter or landowner approval. The percentage of approval required depends on the type of funding mechanism sought. The State Constitution authorizes special districts to impose special taxes with a two-thirds approval of the electors or with a 50 percent plus one vote for a benefit assessment. The two-thirds requirement was reinforced in 1986 by Proposition 62 and again in 1996 by Proposition 218. In Stanislaus County, the majority of fire protection districts have implemented special taxes or assessments,

#### DEVELOPMENT IMPACT FEES

Fire protection districts have the ability to study and approve fire facilities impact fees, yet before they are imposed they must be ratified by the county board of supervisors. These fees are onetime charges applied to new development to raise revenue for construction or expansion of capital facilities that benefit the contributing development. Since development in Stanislaus County occurs primarily within the populated areas, the magnitude of development fees in rural areas is not a significant source of revenue for the districts. Nonetheless, this fee does provide an opportunity to augment the district's budget, particularly for those districts that have more substantial urban development. Rural fire districts should take advantage of this additional funding source and work with the County to establish a development fee schedule for collection.

#### FEES FOR SERVICE

Fire districts have limited authority to collect fees to cover the actual costs of providing service or the impact of additional service needs. Generally, fees represent only a small portion of total revenue. Fees that are permitted include development impact fees, plan check fees, and some limited fees for services. Calls for service require staff, time and resources. A number of districts are currently collecting fees for responding to vehicle accidents that occur within their districts in order to recover costs. It is probable that additional districts will begin exploring the idea.

| District             | Revenues<br>(Year Ending) | District             | Revenues<br>(Year Ending) |
|----------------------|---------------------------|----------------------|---------------------------|
| District             |                           | District             | •                         |
| Burbank-Paradise FPD | \$336,776 (2022)          | Oakdale Rural FPD    | \$2,376,721(2022)         |
| Ceres FPD            | \$167,908 (2022)          | Salida FPD           | \$1,973,602 (2020)        |
| Denair FPD           | \$680,428 (2022)          | Stanislaus Cons. FPD | \$12,011,408 (2021)       |
| Hughson FPD          | \$842,626 (2019)          | Turlock Rural FPD    | \$434,328.80 (2022)       |
| Industrial FPD       | \$619,828 (2020)          | West Stanislaus FPD  | \$1,264,589 (2020)        |
| Keyes FPD            | \$515,000 (2022)          | Westport FPD         | \$429,574 (2022)          |

#### **Figure 9: Total Revenues**

Source: Each district's most recent audit, financials statements, approved budgets and LAFCO surveys of the fire protection districts

Woodland FPD

\$179,542 (2018)

Mountain View FPD

Per capita revenue for the FPDs varies quite significantly and ranges from \$47.87 to \$259.82, as shown in Figure 10 below. The average for all agencies is \$109.44 per capita.

#### Figure 10: Per Capita Revenues

| District             | Per Capita<br>Revenues | District             | Per Capita<br>Revenues |
|----------------------|------------------------|----------------------|------------------------|
| Burbank-Paradise FPD | \$49.03                | Oakdale Rural FPD    | \$195.66               |
| Ceres FPD            | \$87.09                | Salida FPD           | \$99.58                |
| Denair FPD           | \$92.75                | Stanislaus Cons. FPD | \$259.82               |
| Hughson FPD          | \$78.95                | Turlock Rural FPD    | \$87.18                |
| Industrial FPD       | \$47.87                | West Stanislaus FPD  | \$134.05               |
| Keyes FPD            | \$81.22                | Westport FPD         | \$169.52               |
| Mountain View FPD    | \$64.12                | Woodland FPD         | \$85.36                |

The variation in revenue is due to a number of factors, including: 1) the date of the district's formation and past taxation levels; 2) differences in assessed valuation; 3) land development and property sales within the agency's boundaries; and 4) the willingness of local voters to approve tax measures. Despite these variations, all districts strive to provide the highest quality of service possible with available resources.

The use of volunteer firefighters has traditionally been a way to economically provide fire protection. Districts with lower budgets tend to rely heavily on a volunteer force. A strong volunteer force allows a district to provide a much higher level of service on the same budget, because salaries and benefits alone can exceed 80% in a budget for a full-time staffed fire department. Mutual aid agreements also allow neighboring fire agencies to effectively share resources and to assist one another when an emergency occurs.

\$489,257 (2020)

#### LESS-THAN-COUNTYWIDE FIRE TAX

The Less-Than-Countywide Fire Tax (LTCF Tax), also referred to as the County Fire Services Fund, was established in the late 1950s pursuant to Government Code Section 25643. The LTCF Tax was originally established to fund a County Fire Department. Revenue from the LTCF Tax is administered by the Stanislaus County Fire Warden's Office and presided over by the Board of Supervisors. The tax is used to provide support services to fire agencies in the unincorporated areas and other cities in Stanislaus County. In particular, the LTCF Tax provides fire prevention, fire investigation, communications coordination, training, and support for administrative and finance services to fire. The funding is intended to ensure the provision of critical, regional fire support services.

This tax is imposed on all areas of the County except Modesto and Turlock. Funds from the LTCF Tax are not part of any Fire District's revenue base or property tax base and cannot be reallocated directly to a fire district.

In 2005 the Stanislaus County Fire Authority, a joint powers agreement (JPA) comprised of all agencies providing fire protection services within Stanislaus County, was formed to facilitate cooperation among the Fire Agencies and the County related to the allocation and use of the LTCF Tax. The County recognized the advantage of offering regional services and directed the County Fire Warden's Office to serve as the administrating agency of the JPA.

The Fire Authority develops an annual business plan to identify service levels, performance expectations and funding allocations for those services identified as critical to the fire agencies in Stanislaus County. Then, based on available funding, the group targets achievable, sustainable service levels to support those priorities. The business plan is then approved by the Fire Authority for consideration and approval by the Board of Supervisors each year.

#### **PROPOSITION 172**

In 1994, a one-half cent sales tax (Proposition 172) was enacted to help alleviate impacts to local governments associated with lost revenues from the State's educational revenue augmentation fund shift (ERAF). This sales tax, known as the Public Safety Sales Tax, provides additional revenue for local agencies exclusively to fund public safety activities, which were historically allocated by the County for Sheriff, Probation, and District Attorney services.

Beginning in Fiscal Year 2019-2020, the Stanislaus County Board of Supervisors began allocating 2% of the annual growth in Proposition 172 revenue to the Office of Emergency Services/Fire Warden for distribution to support local fire agencies that were negatively impacted by ERAF.

#### Stanislaus LAFCO Policies

While LAFCO may not have control over many external factors affecting fire district revenue (e.g. willingness of voters to approve tax measures, differences in assessed valuations) LAFCO can ensure the mitigation of negative fiscal or service impacts resulting from special district detachments. This is supported by following in Stanislaus LAFCO's adopted Policies and Procedures document by the following policy statement:

LAFCO will deny proposals that would result in significant unmitigable adverse effects upon other service recipients or other agencies servicing the affected area unless the approval is conditioned to avoid such impacts. The Commission encourages cities to address potential financial impacts to the fire protection districts as a result of detachments prior to an application to LAFCO. Recent efforts to establish and implement a revenue-sharing agreement or a transfer of funds between a city and fire district have been achieved. This has proven to be a successful process and outcome when considering annexation and the effects of detachment on a district.

## 3.5 STATUS OF, AND OPPORTUNITIES FOR, SHARED FACILITIES

The rural fire protection districts currently take full advantage of their opportunities with other agencies and partners. Some of these agencies and partners include: California Department of Forestry (CDF); County Fire Warden's Office; Stanislaus Regional 9-1-1 (JPA); and the Modesto Junior College Regional Fire Training Center.

In addition to the individual agency capabilities, there are several systems or subsystems in place within the County that support the operations of the fire delivery system and/or provide enhanced levels of service. They include the following:

- A countywide mutual aid agreement in which any agency can request general or specialized services from another agency.
- Agency automatic aid agreements in which neighboring jurisdictions provide pre-described resources to an incident under an agreement.
- Emergency communications—through the Stanislaus Regional 9-1-1 Center. Emergency medical services are provided through an integrated system utilizing both public and private resources. Fire agencies provide basic life support (BLS) response, with some offering paramedic-level service without transport capabilities. Advanced life support (ALS) and transport services are provided by private vendors as well as Oak Valley Hospital District, Del Puerto Health Care District, and Westside Ambulance, which are special district governmental agencies

As mentioned previously in this report, it should be noted that as of January 1, 2016 and as a result of State Senate Bill 239 (Hertzberg) Government Code Section 56134 requires LAFCO review and approval of fire protection contracts or agreements for the exercise of new or extended fire protection services outside a public agency's jurisdictional boundaries. Mutual aid agreements are not generally subject to such review. However, any fire service contract above the Section 56134 thresholds must now seek LAFCO review and approval.

Currently, the City of Modesto is providing fire protection and related services to the following jurisdictions: City of Ceres, City of Oakdale, Ceres Fire Protection District, Oakdale Rural Fire Protection District, Industrial Fire Protection District and the Salida Fire Protection District. The City of Modesto is also providing administrative services to the Stanislaus Consolidated Fire Protection District and City of Turlock.

## 3.6 ACCOUNTABILITY FOR COMMUNITY SERVICE NEEDS, INCLUDING GOVERNMENTAL STRUCTURE AND OPERATIONAL EFFICIENCIES

Stanislaus County is served by a multitude of agencies providing fire protection services. This municipal service review focuses primarily on the fourteen special districts. Six of the County's nine cities also have municipal fire departments. In addition, CalFire provides services within State Responsibility Areas. All of these organizations are bound together through the State's mutual aid system and agreements between neighboring agencies to provide mutual and automatic aid.

More than 65 elected officials govern structural fire protection in the unincorporated region. The fourteen independent fire protection districts maintain three-to-seven member boards of directors. Fire districts are required to meet regularly and conduct business in accordance with Government Code and open-meeting law.

The following figure illustrates the various forms of selection and/or appointment of the Directors from the various agencies.

| District                    | Directors | Elected / Appointed |
|-----------------------------|-----------|---------------------|
| Burbank-Paradise FPD        | 5         | Elected             |
| Ceres FPD                   | 3         | Elected             |
| Denair FPD                  | 5         | Appointed           |
| Hughson FPD                 | 5         | Elected             |
| Industrial FPD              | 5         | Elected             |
| Keyes FPD                   | 5         | Appointed           |
| Mountain View FPD           | 5         | Appointed           |
| Oakdale Rural FPD           | 5         | Appointed           |
| Salida FPD                  | 5         | Elected             |
| Stanislaus Consolidated FPD | 5         | Appointed           |
| Turlock Rural FPD           | 5         | Appointed           |
| West Stanislaus FPD         | 5         | Appointed           |
| Westport FPD                | 5         | Elected             |
| Woodland Avenue FPD         | 5         | Appointed           |

#### Figure 11: Methods of Appointment/Election

The majority of the County's fire districts maintain websites listing basic information about the district's history, board members, and contacts. These districts include the Burbank-Paradise FPD, Denair FPD, Hughson FPD, Keyes FPD, Mountain View FPD, Oakdale Rural FPD, Stanislaus Consolidated FPD, West Stanislaus FPD, and Westport FPD. The other districts do not maintain websites, although general information about their Board Members meeting dates, and contact information can be found on the County Clerk of the Board's website. The specific websites for each district are listed in their profiles, located in Chapter 5 of this document.

All districts are encouraged to establish websites if they do not now have them, and to maintain up to date information including, at a minimum, a listing of the district directors and their terms, notices of upcoming meetings, meeting agendas and minutes, annual budgets, performance data, and current audits. This information promotes transparency and accountability, as well as allowing public oversight of district activities.

All of the fire protection districts are subject to the requirements of the California Brown Act. Consistent with these requirements, public agendas must be posted by all public agencies at a public location a minimum of 72 hours prior to the meeting. State law also requires that agendas be posted on the agency website, if one exists. All districts must also allow the opportunity for members of the public to directly address the legislative body on any item of interest to the public at every regular meeting.

## 3.7 ANY OTHER MATTER RELATED TO EFFECTIVE OR EFFICIENT SERVICE DELIVERY, AS REQUIRED BY COMMISSION POLICY

#### STATE MANDATES

Contemporary fire service management recognizes that each and every fire agency has to determine its policies and procedures based on local conditions. However, it should also be recognized that fire agencies are mandated to adhere to specific federal and state regulations under certain conditions. Furthermore, the fire profession is one that has adopted a wide variety of technical standards that are recommended and may be utilized by all agencies, whether full-time, combination, or volunteer.

However, these recognized professional standards are not consistently implemented or enforced from one agency to another. For example, a fire agency has to address Federal Occupational Safety and Health Administration (OSHA) requirements for compliance with protective clothing and fire attack practices. However, the manner in which the agency complies varies from community to community. In another instance, all fire agencies must enforce the provisions of local and state fire codes. The manner in which they conduct that enforcement varies according to a wide variety of variables.

On October 10, 2015, Governor Jerry Brown signed SB 239 into law, which took effect on January 1, 2016. The bill amends Government Code Sections 56017.2 and 56133, and adds Government Code Section 56134 relating to the extension of fire protection services outside existing city or district boundaries. In summary, the bill requires LAFCO approval on any new contracts for the extension of fire services greater that 25% of a district's service area or changes in more than 25% of employee status. These types of contracts were previously exempt from LAFCO review. In addition, SB 239 imposes a new process that requires districts to submit an independent comprehensive fiscal analysis with its plan for services. This new requirement will increase processing time and costs for fire agencies considering contracts.

#### FEDERAL STANDARDS

In 1999, OSHA interpreted an existing federal standard regarding respiratory protection. The actual law and the interpretation are quite lengthy and subject to so many refinements that it would not be appropriate to reproduce it in this document.

However, it is important to recognize the far-reaching implications of one of its provisions, the commonly called two-in, two-out rule. The expression refers to conditions where firefighters enter an atmosphere that is immediately dangerous to life and health (IDLH).

Two firefighters are required upon entry and two other firefighters must remain outside the structure. This crew is designated as a rapid intervention team (RIT). This provision has profoundly influenced fire ground operations for structural firefighting.

#### TIME OF DAY

The time of day for responding to alarms is an important consideration among all-volunteer staffed departments. Volunteer staffed fire districts have limited personnel to respond at times due other work related and recreational activities.

A person cannot live or work 20 miles away from a fire station and expect to be a viable member of an effective response force. However, time of day does have a bearing upon the availability of individuals. If a person lives close to the firehouse but works elsewhere, it creates one set of circumstances. Conversely, if an individual works close to the firehouse but lives further away, that creates a different environment. If is not uncommon in volunteer fire departments for organizations to create staffing patterns based upon lifestyle.

The International Association of Fire Chiefs, through its Volunteer Combination Officers Section (VCOS), has published documents that clearly illustrate that dealing with time-of-day issues is a management and leadership issue within all volunteer organizations. This is one of the reasons why it is important for fire departments to keep attendance records on recalls. In the event a department has a very unreliable response force at any given time of day, how they recruit and retain volunteer firefighters is a major consideration.

# CHAPTER 4: SPHERE OF INFLUENCE UPDATE

Government Code Section 56076 defines a sphere of influence as "a plan for the probable physical boundaries and service area of a local agency, as determined by the commission". Government Code Section 56425 gives purpose to the determination of sphere by charging the Commission with the responsibility of "planning and shaping the logical and orderly development of local governmental agencies" through spheres of influence. This section also presents factors that the Commission must consider when making a sphere determination.

LAFCO creates, amends, and updates spheres of influence (SOI) to indicate to local agencies and property owners that, at some future date, a particular area is anticipated to require the level of municipal services offered by the subject agency. It is a key component of the planning process, as it indicates to land use authorities and interested parties whether LAFCO expects a need for a jurisdictional change. It also indicates to other potential service providers which agency LAFCO believes to be best situated to offer the services in question. The time horizon for evaluating this anticipated need has changed with each reform of the LAFCO law.

#### SPHERE OF INFLUENCE DETERMINATIONS

In determining a sphere of influence (SOI) of each local agency, the Commission shall consider and prepare determinations with respect to each of the following factors, pursuant to Government Code Section 56425:

- 1. The present and planned land uses in the area, including agricultural and open-space lands.
- 2. The present and probable need for public facilities and services in the area.
- 3. The present capacity of public facilities and adequacy of public services that the agency provides or is authorized to provide.
- 4. The existence of any social or economic communities of interest in the area if the commission determines that they are relevant to the agency.
- 5. For an update of a sphere of influence of a city or special district that provides public facilities or services related to sewers, municipal and industrial water, or structural fire protection, the present and probable need for those public facilities and services of any disadvantaged unincorporated communities within the existing sphere of influence.

#### SPHERE OF INFLUENCE UPDATE PROCESS

A special district is a government agency that is required to have an adopted and updated sphere of influence. Section 56425(g) of the CKH Act calls for spheres of influence to be reviewed and updated every five years, as necessary. Stanislaus LAFCO processes municipal service reviews and sphere of influence updates concurrently to ensure efficient use of resources.

For rural fire protection special districts, which do not have the typical municipal-level services to review, this document will be used to determine what type of services each district is expected to provide and the extent to which they are actually able to do so. For these special districts, the spheres will delineate the service capability and expansion capacity of the agency, if applicable.

Spheres of Influence for the fire protection districts (FPDs) were originally adopted by the Commission in 1984. The most recent sphere of influence update for the FPDs was completed in 2016, with the exception of the Oakdale Rural Fire Protection District (ORFPD). ORFPD updated its Sphere of Influence in 2018. This current update serves to comply with Government Code Section 56425 and will reflect slight changes in the SOIs for several Districts. For the fire protection districts, their spheres of influence are contiguous with their present boundaries. However, in most cases, an existing city SOI overlaps these boundaries.

#### COMMISSION POLICIES

LAFCO policies recognize that city spheres of influence take precedence over those of the rural fire districts. These instances are referred to as "diminishing spheres." As areas are annexed into the cities, they are detached from the rural fire district to avoid duplication of services within the city's incorporated boundary and reduce the number of resources required by service providers to achieve efficiency and effectiveness. In other words, territory is detached from the fire district upon annexation to a city which provides its own municipal fire services. Most of the fire districts within Stanislaus County have diminishing spheres of influence.

In 1984, when the fire protection districts' SOIs were initially adopted, districts with diminishing spheres were made aware of this policy. The policy is reflected in Policy 4B of the Commission's Policies and Procedures, which states that the Commission prefers annexation to a city rather than a district if both can provide comparable services. LAFCO recognizes the long-term effects of city annexations and district detachments, including the reduction of tax base and service area in the district.

As mentioned previously, the vast majority of revenue for the fire protection districts is derived from property taxes. The detachment of property from a district to a city is an ongoing concern for the districts. Annexations by cities and/or border re-alignments result in an erosion of the property tax base for a district. There is also a loss of revenue from existing benefit assessments.

Annexation and detachment is a complex issue that can result in the development of friction and dissent when it occurs. The detachment process between cities and districts is subject to negotiation according to the California Government Code Section 57326, which states in part:

As an alternative to any procedure prescribed by law for the division of taxes or assessments collected in a district lying partially or wholly in territory annexed by an incorporated city, the city and the district may enter into an agreement providing that the district shall continue to perform services for the annexed territory until the close of the fiscal year for which the district has levied taxes or assessments.

The Commission has, in the past, approved annexations where a district and city have come to an agreement to assist the district during a transitionary period following annexation with detachment. These agreements have typically provided for a subsidy provided by the city in an amount equivalent to the assessment revenue a district would normally receive for the area to be detached. An example of this type of agreement occurred between the Turlock Rural Fire Protection District and the City of Turlock as part of the Westside Industrial Specific Plan Reorganization. In rare instances, the Commission has also approved annexations without detachment from a district. This has occurred when there is an existing contract between a city and district that provides for services in the affected area. For example, in 2012, the City of Modesto annexed 145± acres known as the Shackelford area. As part of the annexation, the City of Modesto requested that the affected area *not* detach from the Industrial Fire Protection District. The District had, and still does presently, an agreement with the cities of Ceres and Modesto to provide fire services within their respective sphere of influence. The annexation represented approximately 7.5% of the District's total acreage. As a result of remaining within the District, there is continued collection of fire assessments in the affected area. The Shackelford area remains within the Industrial Fire Protection District to this day with the City of Modesto providing fire service to the area.

# CHAPTER 5: FIRE PROTECTION DISTRICT PROFILES & DETERMINATIONS

#### DISTRICT PROFILES

This chapter contains information about each of the fourteen special districts within Stanislaus County that provide fire protection. These Districts are:

#### Figure 12: Fire Protection Districts (FPDs) to be Reviewed

| Burbank-Paradise FPD | Oakdale Rural FPD           |
|----------------------|-----------------------------|
| Ceres FPD            | Salida FPD                  |
| Denair FPD           | Stanislaus Consolidated FPD |
| Hughson FPD          | Turlock Rural FPD           |
| Industrial FPD       | West Stanislaus FPD         |
| Keyes FPD            | Westport FPD                |
| Mountain View FPD    | Woodland Avenue FPD         |

Each district profile contains a summary, background information, and data on district operations and boundaries. Most profiles include tables and charts outlining district formation and duties, funding sources, attributes, types of service, stations, and calls for service. A map of the District's current Sphere of Influence and boundaries are included within each district's profile.

#### DISTRICT-BY-DISTRICT DETERMINATIONS

Followed by each District profile will be the required Municipal Service Review (MSR) and Sphere of Influence Update (SOI) determinations for that respective District.

#### **Municipal Service Review Determinations**

The purpose of this set of determinations is to identify the specific factors that are being faced by the various organizations reviewed in this study.

These factors, as follows, were recently amended to include the consideration of disadvantaged unincorporated communities<sup>6</sup> within or contiguous to the sphere of influence of an agency. The Service Review will also provide a basis to evaluate, and make changes to the Spheres of Influence, if appropriate

#### Service Review Factors to be Addressed

- 1. Growth and population projections for the affected area
- 2. The location and characteristics of any disadvantaged, unincorporated communities within or contiguous to the sphere of influence

<sup>&</sup>lt;sup>6</sup> Under Government Code Section 56033.5, "disadvantaged unincorporated community" is defined as an inhabited territory (12 or more registered voters), or as determined by commission policy, with an annual median household income that is less than 80% of the statewide annual median household income.

- 3. Present and planned capacity of public facilities and adequacy of public services, including infrastructure needs or deficiencies including needs or deficiencies related to sewers, municipal and industrial water, and structural fire protection in any disadvantaged, unincorporated communities within or contiguous to the sphere of influence.
- 4. Financial ability of agencies to provide services
- 5. Status of, and opportunities for, shared facilities
- 6. Accountability for community service needs, including governmental structure and operational efficiencies
- 7. Any other matter related to effective or efficient service delivery, as required by commission policy

#### Sphere of Influence Update Determinations

Government Code Section 56076 defines a sphere of influence as "a plan for the probable physical boundaries and service area of a local agency, as determined by the commission". Government Code Section 56425 gives purpose to the determination of sphere by charging the Commission with the responsibility of "planning and shaping the logical and orderly development of local governmental agencies" through spheres of influence. This section also presents factors that the Commission must consider when making a sphere determination

In determining a sphere of influence (SOI) of each local agency, the Commission shall consider and prepare determinations with respect to each of the following factors, pursuant to Government Code Section 56425:

- 1. The present and planned land uses in the area, including agricultural and open-space lands.
- 2. The present and probable need for public facilities and services in the area.
- 3. The present capacity of public facilities and adequacy of public services that the agency provides or is authorized to provide.
- 4. The existence of any social or economic communities of interest in the area if the commission determines that they are relevant to the agency.
- 5. For an update of a sphere of influence of a city or special district that provides public facilities or services related to sewers, municipal and industrial water, or structural fire protection, the present and probable need for those public facilities and services of any disadvantaged unincorporated communities within the existing sphere of influence.

#### **BURBANK-PARADISE FIRE PROTECTION DISTRICT** 5.1

Address: Phone:

Peter Golling pgolling@bpfire.com www.bpfire.com

#### SUMMARY

The boundaries of the Burbank-Paradise Fire Protection District include unincorporated developed territory in the southwest area of the City of Modesto. The majority of the District is overlapped by the City of Modesto's Sphere of Influence (SOI). District territory is not contiguous, and is comprised of four separate areas. Portions of the district's boundaries are adjacent to the Woodland Avenue and Westport Fire Protection Districts.

#### PROFILE

| Board of Directors: | Curtis King, Rudy Cario, Diana Cario, Evette      |
|---------------------|---|
|                     | Andre, and a vacant position                      |
| Qualifications:     | Elected and appointed, must be a registered       |
|                     | voter within the district.                        |
| Meeting Schedule:   | 3 <sup>rd</sup> Tuesday of every month, 6:00 p.m. |
| Location:           | 1313 Beverly Dr.                                  |

#### DISTRICT FORMATION AND ATTRIBUTES

| Formation Date: | 1942  | Area in Square Miles: 2.6+/-        |
|-----------------|-------|-------------------------------------|
| Population:     | 6,869 | Acres: 1,688+/-                     |

### MUNICIPAL SERVICE REVIEW DETERMINATIONS

BURBANK-PARADISE FIRE PROTECTION DISTRICT

|    | FACTORS TO BE ADDRESSED   | DETERMINATION  |
|----|---|--|
| 1. | Growth and population projection for the affected area.   | Much of the District's boundary consists of<br>existing residential and commercial<br>development. Based on this existing<br>development and few opportunities for infill,<br>significant population increases are not<br>projected. As the District's boundary is fully<br>within the City of Modesto's Sphere of<br>Influence, it is subject to detachments upon<br>City annexations that affect the amount of<br>assessments collected by the District.<br>Although there are no plans for large-scale<br>annexations in the area, eventually these<br>detachments will reduce the District's<br>acreage to where operations are no longer<br>viable. |
| 2. | The location and characteristics of any<br>disadvantaged unincorporated communities<br>within or contiguous to the sphere of<br>influence.  | Based on annual median household income,<br>the Riverdale Park Tract, the Rouse<br>Neighborhood, and portions of West<br>Modesto are identified as Disadvantaged<br>Unincorporated Communities (DUCs) as<br>defined in Section 56033.5 of the Cortese-<br>Knox-Hertzberg Act of 2000. These areas<br>are generally comprised of older, residential<br>neighborhoods. No additional DUCs have<br>been identified within or contiguous to the<br>District's sphere of influence  |
| 3. | Present and planned capacity of public<br>facilities and adequacy of public services,<br>including infrastructure needs or deficiencies<br>including needs or deficiencies related to<br>sewers, municipal and industrial water, and<br>structural fire protection in any<br>disadvantaged, unincorporated communities<br>within or contiguous to the sphere of<br>influence. | The District remodeled the existing station on<br>Beverly Drive in West Modesto and has also<br>identified the need to construct an additional<br>station south of the Tuolumne River near<br>Hatch Road and Parkdale Drive. The District<br>is researching funding mechanisms to<br>implement these future endeavors as<br>currently the funds are not available.<br>The District has recently overhauled previous<br>administrative plans that provided minimal<br>replacement of equipment with poor used<br>equipment to more current plans of financing<br>and replacement of units on a 10 year cycle.   |

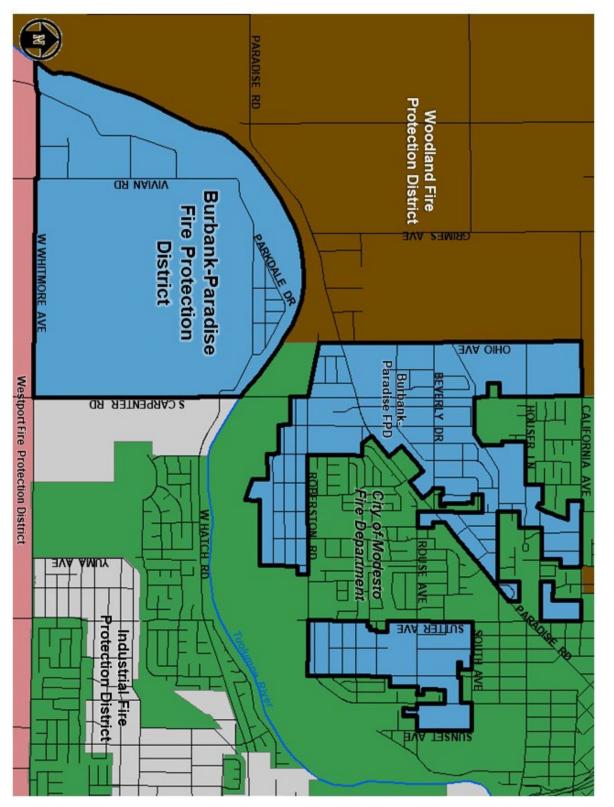

| 4. | Financial ability of agencies to provide services.   | District voters approved a special tax known<br>as Measure C to replace an existing<br>assessment. The additional revenue can be<br>spent on prevention and emergency<br>services, equipment maintenance and<br>personnel costs. The District is not currently<br>collecting development fees as much of the<br>District has already been developed. |
|----|--|--|
| 5. | Status of, and opportunities for, shared facilities.   | This District could benefit from shared<br>support service provided by a joint powers<br>authority. No shared support service is<br>proposed at this time except for a County-<br>wide mutual aid agreement.   |
| 6. | Accountability for community service needs,<br>including governmental structure and<br>operational efficiencies. | The District is governed by a Board of<br>Directors comprised of 5 members. Each<br>Board Member is elected by voters within the<br>District and serves a 4-year term. The<br>District could ultimately be faced with a need<br>to be dissolved if it becomes underfunded<br>and cannot continue to operate through<br>annexations and detachments.  |
| 7. | Any other matter related to effective or<br>efficient service delivery, as required by<br>Commission policy.     | The District does not have a long-term<br>planning document. This could lead to<br>conditions that render it unprepared.   |

#### SPHERE OF INFLUENCE UPDATE DETERMINATIONS AND RECOMMENDATIONS BURBANK-PARADISE FIRE PROTECTION DISTRICT

|    | FACTORS TO BE ADDRESSED   | DETERMINATION  |
|----|---|--|
| 1. | The present and planned land uses in the area, including agricultural and open-space lands  | The current area of the Burbank-Paradise<br>Fire Protection District is approximately 1,688<br>acres and is generally located in the<br>southwest area of Modesto. The majority of<br>this area is overlapped by the Modesto<br>Sphere of Influence, with the exception of a<br>small area west of Vivian Road. Land uses<br>within the District include existing residential,<br>commercial, as well as agricultural and<br>vacant land. The Stanislaus County General<br>Plan identifies the area as low-density<br>residential, medium-density residential,<br>agriculture, and commercial. There are no<br>changes in the planned land uses in the<br>District as a result of this review. |
| 2. | Present and probable need for public facilities and services in the area  | Until such time as the City of Modesto<br>annexes the lands within the District, services<br>will continue to be needed at the current<br>demand. Annexation of the area and<br>intensity of land use in the area may increase<br>calls and workload. Due to the District's<br>diminishing sphere, annexation would also<br>mean detachment from the District, leading<br>services to be provided by the City's fire<br>department.  |
| 3. | Present capacity of public facilities and<br>adequacy of public services that the<br>agency provides or is authorized to provide              | The MSR section provides a discussion of the services provided by the District, their present capacities, and infrastructure needs. The district is currently staffed with volunteers and part-time personnel.   |
| 4. | The existence of any social or economic communities of interest in the area if the commission determines that they are relevant to the agency | There are no known communities of interest<br>in the area. However, it should be noted that<br>there are two portions of the District that are<br>entirely surrounded by the City of Modesto.  |

| 5. | For an update of a sphere of influence of a<br>city or special district that provides public<br>facilities or services related to sewers,<br>municipal and industrial water, or structural<br>fire protection, the present and probable<br>need for those public facilities and services<br>of any disadvantaged unincorporated<br>communities within the existing sphere of<br>influence  | The Riverdale Park Tract, Rouse<br>Neighborhood, and portions of<br>unincorporated West Modesto are identified<br>as Disadvantaged Unincorporated<br>Communities (DUCs) as defined in Section<br>56033.5 of the Cortese-Knox-Hertzberg Act<br>of 2000. Additional services, such as sewer<br>and water are provided through other special<br>districts or by way of private systems. |
|----|--|--|
|    | RECOMM   | IENDATION  |
|    | Pursuant to Government Code Section 56425(i)(2), the Commission does hereby establish<br>the functions and classes of services provided by the Burbank-Paradise Fire Protection<br>District (FPD) as those specified in the California Health & Safety Code §13862. Based<br>upon the information contained in this document, it is recommended that the Burbank-<br>Paradise FPD Sphere of Influence be updated to affirm its current sphere, as shown on |  |

# 5.2 CERES FIRE PROTECTION DISTRICT

Address: City/State/Zip: Phone: 2755 Third Street Ceres, CA 95307 209-538-3003 Contact: Email: Kevin Wise, Assistant Chief <u>kwise@modestofire.com</u>

#### SUMMARY

The Ceres Fire Protection District boundaries include unincorporated territory located southeasterly of the City of Ceres. The majority of the District territory is within the city's Sphere of Influence. Only the portion located south of Turlock Irrigation District lateral number two is outside the City's Sphere of Influence. The District currently contracts with the City of Modesto to provide its fire protection services. The District is adjacent to the Westport, Keyes, and Hughson Fire Protection Districts.

#### PROFILE

| Board of Directors: | Gary Marchy, Robert Rensted, Vacant                      |
|---------------------|--|
| Qualifications:     | Elected, must be a registered voter within the district. |
| Meeting Schedule:   | As needed  |
| Location:           | 2755 Third St. Ceres, CA 95307.                          |

### Calls for Service Ceres Fire Protection District Total 235 Calls

## MUNICIPAL SERVICE REVIEW DETERMINATIONS

CERES FIRE PROTECTION DISTRICT

| [  | FACTORS TO BE ADDRESSED  | DETERMINATION  |
|----|--|--|
| 1. | Growth and population projection for the affected area   | Over half of the District's territory is<br>overlapped by the City of Ceres' Sphere of<br>Influence. Little to no growth is projected in<br>the unincorporated areas outside the City's<br>SOI.  |
| 2. | The location and characteristics of any disadvantaged unincorporated communities within or contiguous to the sphere of influence.  | No disadvantaged unincorporated<br>communities have been identified within or<br>contiguous to the District's Sphere of Influence<br>as defined in Section 56033.5 of the CKH Act.   |
| 3. | Present and planned capacity of public<br>facilities and adequacy of public services,<br>including infrastructure needs or<br>deficiencies including needs or<br>deficiencies related to sewers, municipal<br>and industrial water, and structural fire<br>protection in any disadvantaged,<br>unincorporated communities within or<br>contiguous to the sphere of influence | The District has historically had a contract with<br>the City of Ceres for fire protection service. In<br>2021, the City of Ceres entered into an<br>agreement with the City of Modesto for the<br>provision of fire protection and related services<br>by Modesto to the City of Ceres. The<br>agreement included all of Ceres' contracted<br>services areas, including the Ceres Fire<br>Protection District and Industrial Fire<br>Protection District. |
|    |  | No disadvantaged unincorporated<br>communities have been identified within or<br>contiguous to the District's Sphere of<br>Influence. Properties within the District are<br>primarily served with private water (well) and<br>septic systems.  |
| 4. | Financial ability of agencies to provide services  | Per capita expenditures are below the regional<br>median. The District is not currently collecting<br>development fees. Annexations to the City<br>with simultaneous detachment from the<br>District reduce the revenue the District<br>receives from special assessments and thus<br>the amount of revenue it can contribute<br>towards the contract with the City of Ceres.  |
| 5. | Status of, and opportunities for, shared facilities  | The District receives services as a result of a contract with the City of Modesto for fire protection service.   |
| 6. | Accountability for community service needs, including governmental structure and operational efficiencies  | The District is governed by a Board of<br>Directors comprised of 3 members. Each<br>Board Member is elected and serves a 4-year<br>term.   |
| 7. | Any other matter related to effective or<br>efficient service delivery, as required by<br>Commission policy  | None at this time.   |

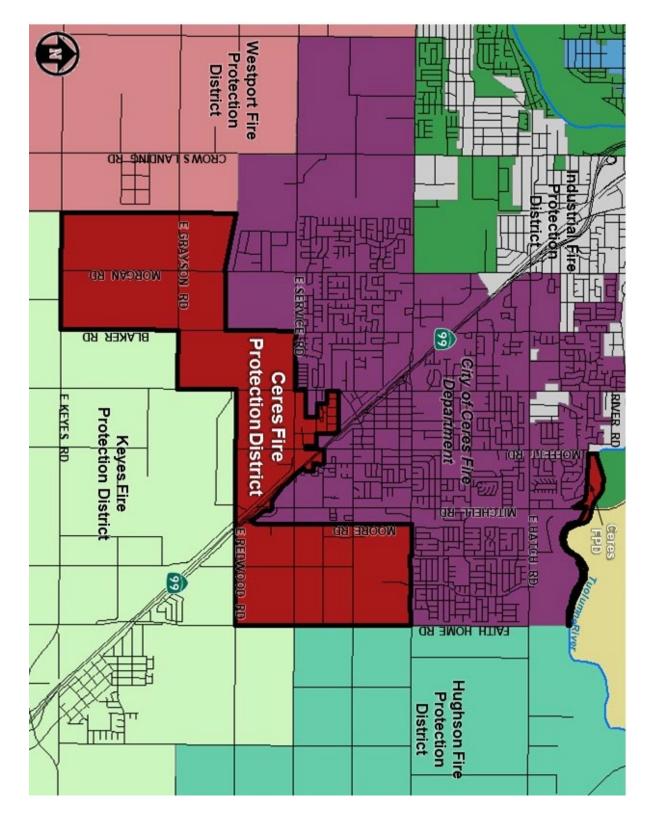

#### SPHERE OF INFLUENCE UPDATE DETERMINATIONS AND RECOMMENDATIONS CERES FIRE PROTECTION DISTRICT

|    | FACTORS TO BE ADDRESSED  | DETERMINATION  |
|----|--|--|
| 1. | The present and planned land uses in the<br>area, including agricultural and open-space<br>lands   | The current area of the Ceres Fire Protection<br>District is approximately 2,539 acres and is<br>generally located to the southeast of the City<br>of Ceres, with the exception of two small<br>areas along the Tuolumne River, adjacent to<br>the City of Ceres. The majority of the area<br>falls within the Ceres Sphere of Influence.<br>Land uses within the district include existing<br>residential, ranchettes, agricultural and vacant<br>land, as well as small areas of medium-<br>density residential and industrial uses close to<br>the City's limits. There are no changes in the<br>planned land uses in the District as a result of<br>this review. |
| 2. | Present and probable need for public facilities and services in the area   | Based on present and planned land uses,<br>there is a continued need for services in the<br>area. Until such time as the City of Ceres<br>annexes the lands within the District, services<br>will continue to be needed at the current<br>demand. Annexation of the area and intensity<br>of land use in the area may increase calls and<br>workload. Due to the District's diminishing<br>sphere, annexation would also mean<br>detachment from the District.   |
| 3. | Present capacity of public facilities and<br>adequacy of public services that the<br>agency provides or is authorized to provide               | The MSR section provides a discussion of the services provided by the District, their present capacities, and infrastructure needs. The District currently contracts with the City of Modesto to provide its fire suppression services.  |
| 4. | The existence of any social or economic communities of interest in the area if the commission determines that they are relevant to the agency. | There are no known communities of interest in the area.  |

| 5. | For an update of a sphere of influence of a   | No disadvantaged unincorporated                 |
|----|---|---|
|    | city or special district that provides public | communities have been identified within or      |
|    | facilities or services related to sewers,     | contiguous to the District's Sphere of          |
|    | municipal and industrial water, or structural | Influence as defined in Section 56033.5 of      |
|    | fire protection, the present and probable     | the CKH Act. Fire protection services are       |
|    | need for those public facilities and services | contracted out to the City of Modesto.          |
|    | of any disadvantaged unincorporated           | Additional services, such as sewer and water,   |
|    | communities within the existing sphere of     | are provided through other special districts or |
|    | influence                                     | by way of private systems.                      |
|    |   |   |

#### RECOMMENDATION

Pursuant to Government Code Section 56425(i)(2), the Commission does hereby establish the functions and classes of services provided by the Ceres Fire Protection District (FPD) as those specified in the California Health & Safety Code §13862. Based upon the information contained in this document, it is recommended that the Ceres FPD Sphere of Influence be updated to affirm its current sphere, as shown on Map 5.

## 5.3 DENAIR FIRE PROTECTION DISTRICT

Address: Mail: City/State/Zip: Phone: 3918 N. Gratton Rd. Post Office Box 262 Denair, CA 95316 209-523-1129 Fire Chief: Email: Website: Daniel Schroeder denairchief@denairfire.com www.denairfire.com

CTION D

#### SUMMARY

The Denair Fire Protection District is located east of the City of Turlock and includes the unincorporated community of Denair. A small westerly portion of the District is within of the City of Turlock's Sphere of Influence. District boundaries extend south to the Stanislaus-Merced County line. The District is adjacent to the Turlock Rural, Keyes, Stanislaus Consolidated, and Hughson Fire Protection Districts.

## MUNICIPAL SERVICE REVIEW DETERMINATIONS

DENAIR FIRE PROTECTION DISTRICT

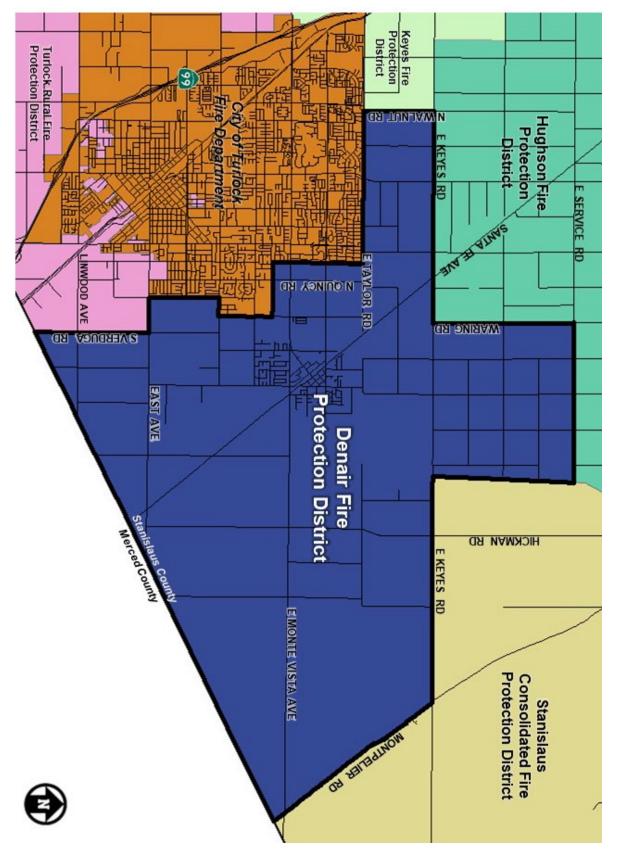

|    | FACTORS TO BE ADDRESSED  | DETERMINATION   |
|----|--|---|
| 1. | Growth and population projection for the affected area   | Growth is limited, primarily occurring as infill<br>in the unincorporated community of Denair.<br>New housing units, part of approved<br>subdivisions consistent with the Denair<br>Community Plan, will increase demand for<br>services. Two areas along the District's<br>western boundary are overlapped by the City<br>of Turlock's Sphere of Influence, which may<br>lead to detachment from the District should<br>they be annexed to the City. |
| 2. | The location and characteristics of any<br>disadvantaged unincorporated<br>communities within or contiguous to the<br>sphere of influence  | No disadvantaged unincorporated<br>communities have been identified within or<br>contiguous to the District's Sphere of<br>Influence as defined in Section 56033.5 of<br>the CKH Act.   |
| 3. | Present and planned capacity of public<br>facilities and adequacy of public services,<br>including infrastructure needs or<br>deficiencies including needs or<br>deficiencies related to sewers, municipal<br>and industrial water, and structural fire<br>protection in any disadvantaged,<br>unincorporated communities within or<br>contiguous to the sphere of influence | The District relies on a volunteer labor force<br>to meet its demands. The District identified<br>that is currently accepting bids on a remodel<br>of its current station. The remodel will<br>include flooring, a kitchen remodel, larger<br>women's restroom, ADA compliant restrooms<br>and showers.   |
| 4. | Financial ability of agencies to provide services.   | Per capita revenues are below the regional<br>average. The District is currently collecting<br>development impact fees and receives funds<br>from a special tax known as Measure D<br>levied on properties in its boundaries.   |
| 5. | Status of, and opportunities for, shared facilities  | The District is currently part of a countywide<br>mutual aid agreement in which any agency<br>can request general or specialized services<br>from another agency.   |
| 6. | Accountability for community service<br>needs, including governmental structure<br>and operational efficiencies  | The District is governed by a Board of<br>Directors comprised of 5 members. Each<br>Board Member is appointed by the Board of<br>Supervisors and serves a three-year term,<br>with a two-term limitation.   |
| 7. | Any other matter related to effective or<br>efficient service delivery, as required by<br>Commission policy  | None at this time.  |

#### SPHERE OF INFLUENCE UPDATE DETERMINATIONS AND RECOMMENDATIONS DENAIR FIRE PROTECTION DISTRICT

|    | FACTORS TO BE ADDRESSED  | DETERMINATION   |
|----|--|---|
| 1. | The present and planned land uses in the<br>area, including agricultural and open-space<br>lands   | The current area of the Denair Fire Protection<br>District is approximately 22,358 acres and is<br>generally located surrounding the<br>unincorporated community of Denair and<br>areas to the northeast and east of the City of<br>Turlock. Approximately 540 acres of the<br>District are overlapped by the City of<br>Turlock's Sphere of Influence. Land uses<br>within the District include existing residential,<br>commercial, as well as agricultural and<br>vacant land. There are no changes in the<br>planned land uses in the District as a result of<br>this review. |
| 2. | Present and probable need for public facilities and services in the area   | Based on present and planned land uses,<br>there is a continued need for services in the<br>area. Until such time as the City of Turlock<br>annexes the lands within the District, services<br>will continue to be needed at the present<br>demand. Annexation of the area and<br>intensity of land use in the area may increase<br>calls and workload. Due to the District's<br>diminishing sphere, annexation would also<br>mean detachment from the District, leading<br>services to be provided by the City's fire<br>department.   |
| 3. | Present capacity of public facilities and<br>adequacy of public services that the<br>agency provides or is authorized to provide               | The District relies on a volunteer labor force<br>and is currently involved in automatic aid<br>which improves efficiency and effectiveness.<br>Voters in the District recently passed a tax<br>measure to provide additional money to the<br>district for a paid firefighter and future<br>infrastructure needs.   |
| 4. | The existence of any social or economic communities of interest in the area if the commission determines that they are relevant to the agency. | As mentioned previously, the unincorporated community of Denair is fully within the District's boundaries.  |

| 5. | For an update of a sphere of influence of a<br>city or special district that provides public<br>facilities or services related to sewers,<br>municipal and industrial water, or structural<br>fire protection, the present and probable<br>need for those public facilities and services<br>of any disadvantaged unincorporated<br>communities within the existing sphere of<br>influence. | No disadvantaged unincorporated<br>communities have been identified within or<br>contiguous to the District's Sphere of<br>Influence as defined in Section 56033.5 of<br>the CKH Act. Additional services, such as<br>sewer and water, are provided through other<br>special districts or by way of private systems. |  |
|----|--|--|--|
|    | RECOMMENDATION   |  |  |
|    | Recomment to Covernment Code Section 56425(i)(2), the Commission does hereby establish   |  |  |

Pursuant to Government Code Section 56425(i)(2), the Commission does hereby establish the functions and classes of services provided by the Denair Fire Protection District (FPD) as those specified in the California Health & Safety Code §13862. Based upon the information contained in this document, it is recommended that the Denair FPD Sphere of Influence be updated to affirm its current sphere, as shown on Map 6.

## 5.4 HUGHSON FIRE PROTECTION DISTRICT

Address:2316 3rd St.Mail:Post Office Box 37City/State/Zip:Hughson, CA 95326-0037Phone:209-883-2863

Fire Chief: Email:

Scott Berner sberner@hughsonfire.com

Website: www.hughsonfire.com

#### SUMMARY

The Hughson Fire Protection District lies south of the Tuolumne River and east of the City of Ceres. The district is adjacent to the Keyes, Denair, and Stanislaus Consolidated Fire Protection district boundaries. District boundaries include the entirety of the City of Hughson.

#### PROFILE

| Board of Directors:            | Dave Absher, Anthony Dodds, Mark Hughes,   |      |
|--------------------------------|--|------|
| Qualifications:                | Gus Villareal, and Miguel Oseguera<br>Elected, must be a registered voter within the |      |
|                                | district. Board members receive \$25 per   | EST. |
|                                | meeting.   |      |
| Meeting Schedule:<br>Location: | Second Wednesday of the month at 7:00 p.m. 2316 3 <sup>rd</sup> St.                  |      |

# MUNICIPAL SERVICE REVIEW DETERMINATIONS

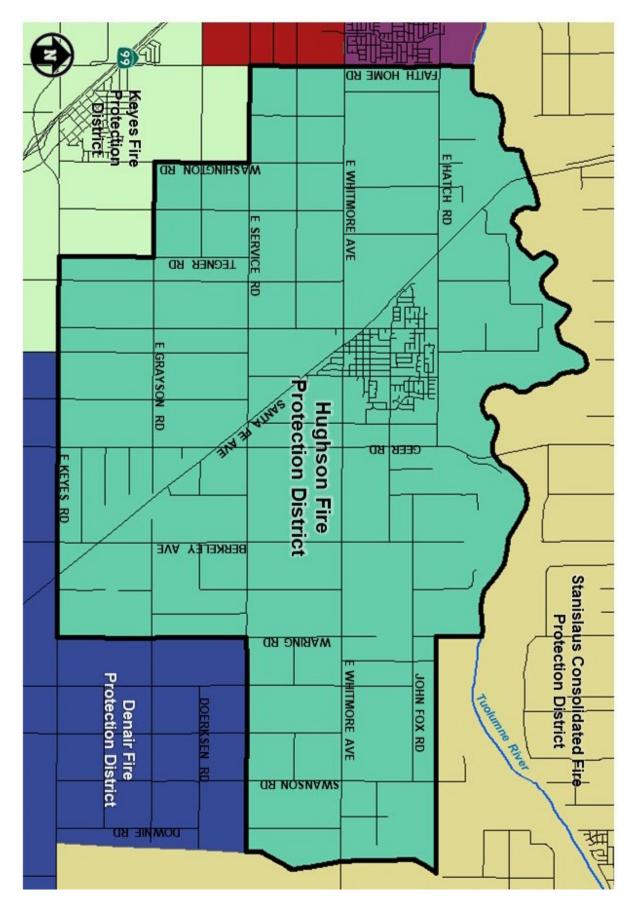

HUGHSON FIRE PROTECTION DISTRICT

|    | FACTORS TO BE ADDRESSED                      | DETERMINATION  |
|----|--|--|
| 4  | Growth and population projection for the     | The District's boundary includes the City of                   |
| 1. | affected area                                | Hughson, where most of the District's                          |
|    |  | population and growth is expected.                             |
|    |  | Population within the City is projected to be                  |
|    |  | 7,862 persons by 2025.   |
| 2. | The location and characteristics of any      | No disadvantaged unincorporated                                |
| ۷. | disadvantaged unincorporated communities     | communities have been identified within or                     |
|    | within or contiguous to the sphere of        | contiguous to the District's Sphere of                         |
|    | influence                                    | Influence as defined in Section 56033.5 of                     |
|    |  | the CKH Act.   |
| 3. | Present and planned capacity of public       | The District relies on a volunteer labor force.                |
|    | facilities and adequacy of public services,  | The District's apparatus bay is within an older                |
|    | including infrastructure needs or            | building that does not meet current fire                       |
|    | deficiencies including needs or deficiencies | station design standards. The building is                      |
|    | related to sewers, municipal and industrial  | maintained and kept in good working order.                     |
|    | water, and structural fire protection in any | No immediate improvement plans are in                          |
|    | disadvantaged, unincorporated communities    | development. However, a replacement of the                     |
|    | within or contiguous to the sphere of        | apparatus building will be needed in the                       |
|    | influence                                    | future.  |
|    |  |  |
|    |  |  |
|    |  |  |
| 4. | Financial ability of agencies to provide     | Per capita revenues are typically below the                    |
|    | services                                     | regional average. The District is currently                    |
|    |  | collecting development impact fees and                         |
|    |  | revenue from a special tax approved by                         |

#### **SPHERE OF INFLUENCE UPDATE DETERMINATIONS AND RECOMMENDATIONS** HUGHSON FIRE PROTECTION DISTRICT

|    | FACTORS TO BE ADDRESSED  | DETERMINATION  |
|----|--|--|
| 1. | The present and planned land uses in the area, including agricultural and open-space lands | The current area of the Hughson Fire<br>Protection District is approximately 19,752<br>acres and is generally located south of the<br>Tuolumne River and east of the City of Ceres.<br>The District includes the Hughson City Limits<br>and Sphere of Influence in its area. The<br>majority of the acreage is agricultural. Land<br>uses within the District also include existing<br>residential, commercial, and industrial uses,<br>particularly in and around the City of<br>Hughson. The Stanislaus County General<br>Plan identifies the unincorporated areas as<br>agricultural. The City of Hughson's General<br>Plan for the area within its Sphere of<br>Influence but outside its existing city limits<br>includes industrial, residential, and urban<br>reserve uses. There are no changes in the<br>planned land uses in the District as a result of<br>this review. The responsibility for land use<br>decisions within the District boundaries is<br>retained by the City of Hughson and<br>Stanislaus County. |
| 2. | Present and probable need for public facilities and services in the area                   | Until such time as the City of Hughson<br>annexes additional land into its City limits,<br>services will continue to be needed at the<br>current demand. Annexation of areas<br>currently designated agricultural and intensity<br>of land use in the area may increase calls<br>and workload. In late 2007, the Hughson<br>City Council approved a contract amendment<br>with NBS Government Services to help form<br>a fire assessment district in order to provide<br>ongoing fire protection funding to help<br>address future growth and expansion of the<br>City.  |

| 3. | Present capacity of public facilities and<br>adequacy of public services that the<br>agency provides or is authorized to provide   | The MSR section provides a discussion of the services provided by the District, their present capacities, and infrastructure needs. The district currently employs a full-time chief, captain, and has a total of 25 volunteer and 3 full-time firefighters. The community's fire service needs are being met.       |  |  |  |
|----|--|--|--|--|--|
| 4. | The existence of any social or economic communities of interest in the area if the commission determines that they are relevant to the agency.   | As noted, the District includes the City of<br>Hughson within its boundaries. There are no<br>other known communities of interest in the<br>area.  |  |  |  |
| 5. | For an update of a sphere of influence of a<br>city or special district that provides public<br>facilities or services related to sewers,<br>municipal and industrial water, or structural<br>fire protection, the present and probable<br>need for those public facilities and services<br>of any disadvantaged unincorporated<br>communities within the existing sphere of<br>influence.   | No disadvantaged unincorporated<br>communities have been identified within or<br>contiguous to the District's Sphere of<br>Influence as defined in Section 56033.5 of<br>the CKH Act. Additional services, such as<br>sewer and water, are provided through other<br>special districts or by way of private systems. |  |  |  |
|    | RECOMMENDATION   |  |  |  |  |
|    | Pursuant to Government Code Section 56425(i)(2), the Commission does hereby establish the functions and classes of services provided by the Hughson Fire Protection District (FPD) as those specified in the California Health & Safety Code §13862. Based upon the information contained in this document, it is recommended that the Hughson FPD Sphere of Influence be updated to affirm its current sphere, as shown on Map 7. |  |  |  |  |

# 5.5 INDUSTRIAL FIRE PROTECTION DISTRICT

| Address:        | 148 Imperial Ave. |
|-----------------|-------------------|
| City/State/Zip: | Modesto, CA 95358 |
| Phone:          | 209-537-3660      |

#### SUMMARY

The Industrial Fire Protection District is located between the cities of Ceres and Modesto and consists of predominately developed territory. The entire District boundaries are located within the City of Modesto's and the City of Ceres' Sphere of Influence. In 2007, the District entered into a Joint Exercise of Powers Agreement (JPA) with both Cities for the provision of fire protection services. In 2021 the City of Modesto began providing services for the City of Ceres through a fire service contract. Therefore, the District is currently receiving services from the City of Modesto.

## MUNICIPAL SERVICE REVIEW DETERMINATIONS

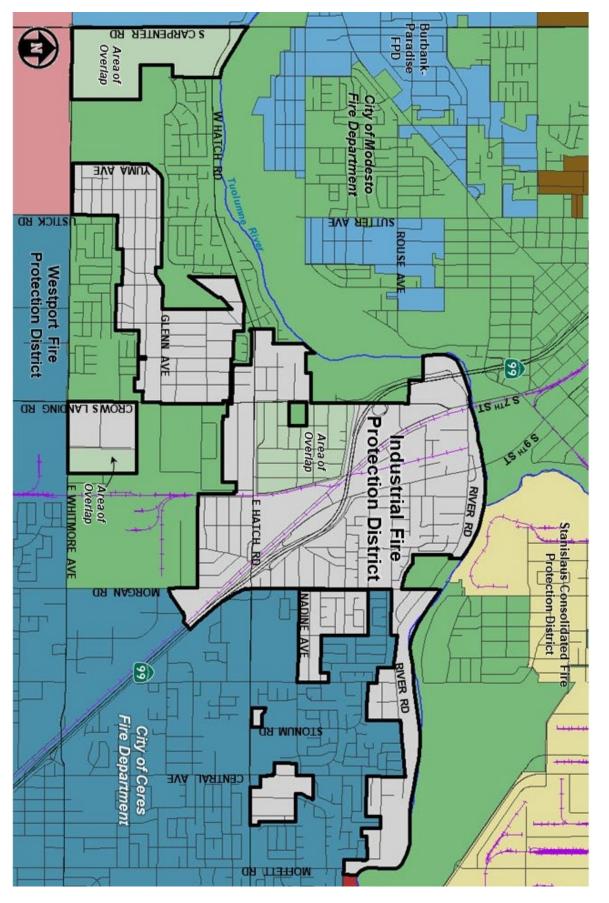

INDUSTRIAL FIRE PROTECTION DISTRICT

| 1  |  | DETERMINATION   |
|----|--|---|
|    | FACTORS TO BE ADDRESSED  | DETERMINATION<br>The District is fully within the Spheres of  |
| 1. | Growth and population projection for the affected area.  | Influence of the City of Modesto and City of<br>Ceres. The majority of the area contains<br>existing residential and commercial<br>development.   |
| 2. | The location and characteristics of any<br>disadvantaged unincorporated<br>communities within or contiguous to the<br>sphere of influence  | Based on annual median household income,<br>the Bystrum Neighborhood (within the City of<br>Ceres' SOI), Bret Harte, Parklawn, part of the<br>Shackelford, and portions of West Modesto<br>(within the City of Modesto's SOI)<br>Neighborhoods are identified as a<br>Disadvantaged Unincorporated Community<br>(DUC) as defined in Section 56033.5 of the<br>Cortese-Knox-Hertzberg Act of 2000.                                     |
| 3. | Present and planned capacity of public<br>facilities and adequacy of public<br>services, including infrastructure needs<br>or deficiencies including needs or<br>deficiencies related to sewers, municipal<br>and industrial water, and structural fire<br>protection in any disadvantaged,<br>unincorporated communities within or<br>contiguous to the sphere of influence | In 2007, a Joint Exercise of Powers Agreement<br>(JPA) was executed by the District, the City of<br>Modesto, and the City of Ceres to create the<br>Modesto-Ceres Fire Protection Agency. This<br>agreement allows each City to provide fire<br>protection services in the areas within their<br>respective Spheres of Influence, while collecting<br>and dividing the revenues normally collected by<br>the District in these areas. |
|    |  | In 2021 the City of Modesto began providing fire<br>protection services for the City of Ceres through<br>a five-year contract. As a result, the City of<br>Modesto is currently the sole provider of fire<br>protection services for the Industrial Fire<br>Protection District.  |
| 4. | Financial ability of agencies to provide services  | Per capita revenues are below the regional<br>median. The District collects a special tax<br>(approved in 1983) and an annual assessment<br>(approved in 1990). Neither has been<br>increased since their original voter approval.<br>The District does not currently collect fire<br>facilities impact or development impact fees.   |
| 5. | Status of, and opportunities for, shared facilities  | The District benefits from services provided by the Modesto-Ceres Fire Protection Agency JPA.   |
| 6. | Accountability for community service needs, including governmental structure and operational efficiencies  | The District is governed by the JPA's Board of<br>Directors comprised of 5 members. Board<br>Members are made up of staff representatives<br>from each agency.  |
| 7. | Any other matter related to effective or<br>efficient service delivery, as required by<br>Commission policy  | None at this time.  |

#### SPHERE OF INFLUENCE UPDATE DETERMINATIONS AND RECOMMENDATIONS INDUSTRIAL FIRE PROTECTION DISTRICT

|    | FACTORS TO BE ADDRESSED  | DETERMINATION  |
|----|--|--|
| 1. | The present and planned land uses in the area, including agricultural and open-space lands                                       | The current area of the Industrial Fire<br>Protection District is approximately 1,946<br>acres and is generally located between the<br>cities of Ceres and Modesto. The entire<br>District falls within the Spheres of Influence of<br>the City of Ceres and the City of Modesto.<br>Land uses within the District include existing<br>residential, commercial, industrial, as well as<br>small areas of agricultural and vacant land.<br>The Stanislaus County General Plan<br>identifies the area as low-density residential,<br>medium-density residential, industrial, and<br>commercial. There are no changes in the<br>planned land uses in the District as a result of<br>this review. The responsibility for land use<br>decisions within the District boundaries is<br>retained by Stanislaus County.                     |
| 2. | Present and probable need for public facilities and services in the area   | Until such time as the City of Modesto or City<br>of Ceres annexes the lands within the District,<br>services will continue to be needed at the<br>current demand. Annexation of the<br>underdeveloped areas and/or intensity of<br>land use may increase calls and workload.<br>Due to the District's diminishing sphere,<br>annexation would also mean detachment<br>from the District, leading services to be<br>provided by the Modesto or Ceres fire<br>department. Given the District's size and<br>location within the two city spheres, it could<br>easily be consolidated or merged at some<br>point in the future. Prior to annexation of all<br>or part of the territory to the City of Modesto<br>or City of Ceres, the cities should be<br>consulted to determine their intentions for the<br>future of the District. |
| 3. | Present capacity of public facilities and<br>adequacy of public services that the<br>agency provides or is authorized to provide | The District functions under a JPA with the<br>City of Ceres and City of Modesto providing<br>fire protection services in the area.  |

| 4. | The existence of any social or economic<br>communities of interest in the area if the<br>commission determines that they are<br>relevant to the agency   | Communities of interest in the area include<br>the Shackelford and Bret Harte<br>neighborhoods, which are already developed<br>and currently receiving water and sewer<br>services from Modesto. The District also<br>includes a Stanislaus-Ceres Redevelopment<br>area which is being provided with sewer<br>services by the City of Ceres. The District is<br>also made up of island and peninsula areas<br>surrounded by Ceres and Modesto.  |  |
|----|--|---|--|
| 5. | For an update of a sphere of influence of a<br>city or special district that provides public<br>facilities or services related to sewers,<br>municipal and industrial water, or structural<br>fire protection, the present and probable<br>need for those public facilities and services<br>of any disadvantaged unincorporated<br>communities within the existing sphere of<br>influence  | The Bystrum, Bret Harte, Parklawn<br>Neighborhoods and portions of<br>unincorporated West Modesto are identified<br>as Disadvantaged Unincorporated<br>Communities (DUCs) as defined in Section<br>56033.5 of the Cortese-Knox-Hertzberg Act<br>of 2000. The District currently contracts with<br>the City of Ceres and City of Modesto for fire<br>protection services. Additional services,<br>such as sewer and water are provided<br>through other special districts or by way of<br>private systems. |  |
|    | RECOMM   | IENDATION   |  |
|    | Pursuant to Government Code Section 56425(i)(2), the Commission does hereby establish the functions and classes of services provided by the Industrial Fire Protection District (FPD) as those specified in the California Health & Safety Code §13862. Based upon the information contained in this document, it is recommended that the Industrial FPD Sphere of Influence be updated to affirm its current sphere, as shown on Map 8. |   |  |

# 5.6 **KEYES FIRE PROTECTION DISTRICT**

Address:5627 7th St.Mail:Post Office Box 827City/State/Zip:Keyes, CA 95328Phone:209-634-7690

Fire Chief: Email: Website: Raj Singh rsingh@keyesfire.com <u>www.keyesfire.com</u>

## SUMMARY

The Keyes Fire Protection District is located between the cities of Ceres and Turlock, and along Highway 99. The boundary includes the unincorporated community of Keyes and is adjacent to the Ceres, Hughson, Denair, Turlock Rural, and Mountain View Fire Protection District. Small portions of district boundaries are currently within the City of Ceres of Turlock's Sphere of Influence.

# MUNICIPAL SERVICE REVIEW DETERMINATIONS

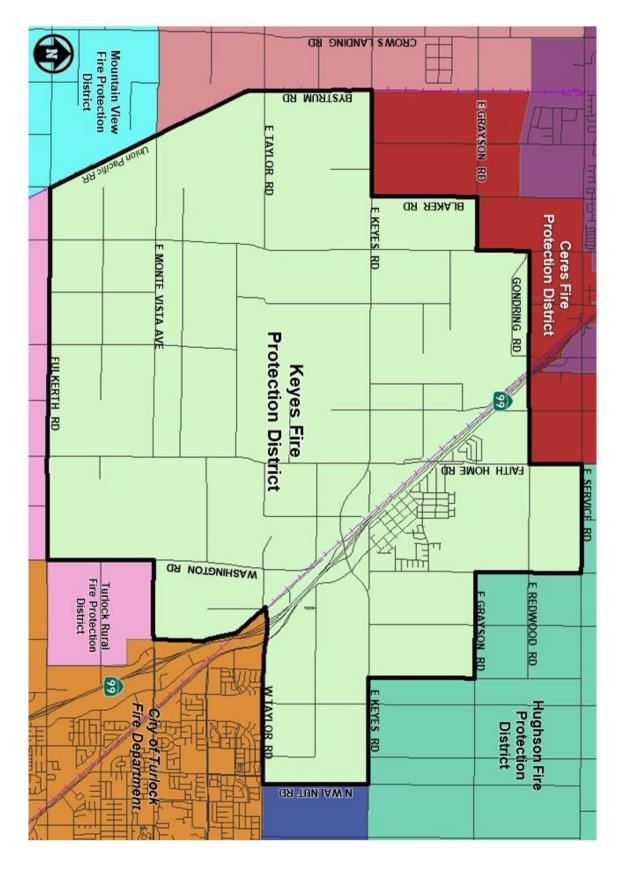

KEYES FIRE PROTECTION DISTRICT

|    | FACTORS TO BE ADDRESSED  | DETERMINATION  |
|----|--|--|
| 1. | Growth and population projection for the affected area   | Growth is limited. New housing units, part of<br>approved subdivisions within the district, will<br>increase demand for services.  |
| 2. | The location and characteristics of any<br>disadvantaged unincorporated<br>communities within or contiguous to the<br>sphere of influence  | Based on annual median household income,<br>the unincorporated community of Keyes is<br>identified as a Disadvantaged Unincorporated<br>Community (DUC) as defined in Section<br>56033.5 of the Cortese-Knox-Hertzberg Act of<br>2000. No additional DUCs have been<br>identified within or contiguous to the District's<br>sphere of influence  |
| 3. | Present and planned capacity of public<br>facilities and adequacy of public<br>services, including infrastructure needs<br>or deficiencies including needs or<br>deficiencies related to sewers, municipal<br>and industrial water, and structural fire<br>protection in any disadvantaged,<br>unincorporated communities within or<br>contiguous to the sphere of influence | The District is currently in the process of<br>designed a new fire station to replace the<br>current station within the current footprint.<br>Once the design process is done, the district<br>will look at different financing options,<br>including loans and grants   |
| 4. | Financial ability of agencies to provide services.   | The District relies on volunteer labor force.<br>The District receives funding from benefit<br>assessments, development fees and property<br>taxes. In 2014, District voters approved an<br>increased fire suppression assessment,<br>updating its prior assessment from 1989.<br>Revenues from the new assessment are<br>expected to bring per capita revenues closer<br>to the regional average. |
| 5. | Status of, and opportunities for, shared facilities  | The District does not currently have a memorandum of understanding with other Districts. The District does provide and receive mutual aid as requested and/or needed.  |
| 6. | Accountability for community service<br>needs, including governmental structure<br>and operational efficiencies  | The District is governed by a Board of<br>Directors comprised of 5 members. Each<br>Board Member is appointed by the Board of<br>Supervisors and serves a three-year term,<br>with a two-term limitation (only if opposed).<br>The District currently has two vacancies on its<br>board.   |
| 7. | Any other matter related to effective or<br>efficient service delivery, as required by<br>Commission policy  | None at this time.   |

#### **SPHERE OF INFLUENCE UPDATE DETERMINATIONS AND RECOMMENDATIONS** KEYES FIRE PROTECTION DISTRICT

|    | FACTORS TO BE ADDRESSED   | DETERMINATION  |
|----|---|--|
| 1. | The present and planned land uses in the area, including agricultural and open-<br>space lands                                      | The current area of the Keyes Fire Protection<br>District is approximately 14,071 acres and is<br>generally located between the cities of Ceres<br>and Turlock, along Highway 99. The District<br>includes the unincorporated community of<br>Keyes. A small portion of the District<br>(approximately 110 acres) falls within the City<br>of Ceres Sphere of Influence (SOI). Land<br>uses within the District include agricultural and<br>vacant land, as well as existing residential,<br>commercial in the community of Keyes, and<br>businesses along Highway 99. The Stanislaus<br>County General Plan identifies the majority of<br>the area as Agriculture, with the exception of<br>the Keyes Community Plan area (low-density<br>residential and commercial) and Planned<br>Development designations along Highway 99.<br>There are no changes in the planned land<br>uses in the District as a result of this review.<br>The responsibility for land use decisions within<br>the District boundaries is retained by<br>Stanislaus County. |
| 2. | Present and probable need for public facilities and services in the area  | Due to the District's diminishing sphere,<br>annexation in the small northern area would<br>also mean detachment from the District,<br>leading services to be provided by the City of<br>Ceres fire department. Until such time as the<br>City of Ceres annexes the lands within the<br>small, overlapping sphere area of the District,<br>services will continue to be needed at the<br>current demand. Annexation of this area or<br>intensity of land uses in the Keyes area may<br>increase calls and workload.  |
| 3. | Present capacity of public facilities and<br>adequacy of public services that the<br>agency provides or is authorized to<br>provide | The MSR section provides a discussion of the services provided by the District, their present capacities, and infrastructure needs. The District relies on a volunteer labor force.  |

| 4. | The existence of any social or economic<br>communities of interest in the area if the<br>commission determines that they are<br>relevant to the agency   | As mentioned, the unincorporated community<br>of Keyes falls within the District's boundaries<br>and a small portion of the City of Ceres SOI<br>overlaps into the District. Due to recent<br>annexations by the City of Turlock, the<br>District's boundaries no longer overlap into<br>Turlock's Sphere of Influence. There are no<br>other known communities of interest in the<br>area.   |  |  |
|----|--|---|--|--|
| 5. | For an update of a sphere of influence of a<br>city or special district that provides public<br>facilities or services related to sewers,<br>municipal and industrial water, or<br>structural fire protection, the present and<br>probable need for those public facilities<br>and services of any disadvantaged<br>unincorporated communities within the<br>existing sphere of influence                                      | The community of Keyes is identified as a<br>Disadvantaged Unincorporated Community<br>(DUC) as defined in Section 56033.5 of the<br>Cortese-Knox-Hertzberg Act of 2000. A new<br>fire station is currently being planned to<br>replace the existing one. Staff increases to<br>keep up with emergency demand are likely to<br>occur. Additional services, such as sewer<br>and water are provided through other special<br>districts or by way of private systems. |  |  |
|    | RECOMMENDATION   |   |  |  |
|    | Pursuant to Government Code Section 56425(i)(2), the Commission does hereby establish the functions and classes of services provided by the Keyes Fire Protection District (FPD) as those specified in the California Health & Safety Code §13862. Based upon the information contained in this document, it is recommended that the Keyes FPD Sphere of Influence be updated to affirm its current sphere, as shown on Map 9. |   |  |  |

Map 9: Keyes Fire Protection District Boundary and Sphere of Influence

# 5.7 MOUNTAIN VIEW FIRE PROTECTION DISTRICT (Information is as of 2016 as the District did not respond)

Address:9633 Crows Landing Rd.City/State/Zip:Crows Landing, CA 95313-9602Phone:209-634-4766

Fire Chief: Email: Website: Carlos Melo cmelomvfd@gmail.com www.mtviewfire.com

### SUMMARY

The Mountain View Fire Protection District is located east of the San Joaquin River and adjacent to the Stanislaus-Merced County line. The district includes territory described as entirely agricultural and rural. There are no unincorporated communities within the district boundaries, and it has no territory within a city Sphere of Influence. District boundaries are adjacent to the West Stanislaus, Turlock Rural, Keyes, and Westport Fire Protection Districts.

# MUNICIPAL SERVICE REVIEW DETERMINATIONS

MOUNTAIN VIEW FIRE PROTECTION DISTRICT

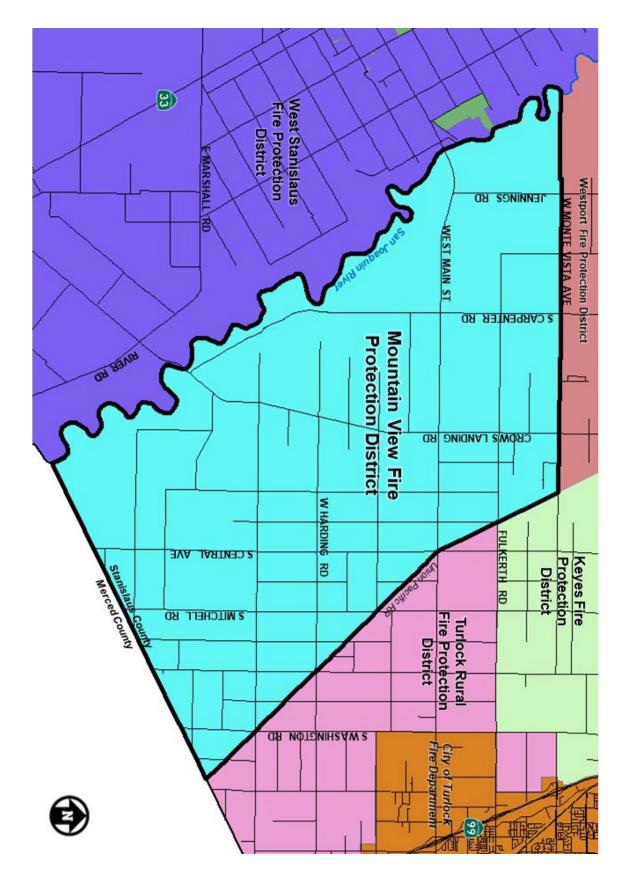

|    | FACTORS TO BE ADDRESSED  | DETERMINATION   |
|----|--|---|
| 1. | Growth and population projection for the affected area.  | The District serves a rural area of Stanislaus<br>County. Significant growth is not anticipated<br>at this time.  |
| 2. | The location and characteristics of any disadvantaged unincorporated communities within or contiguous to the sphere of influence   | No Disadvantaged Unincorporated<br>Communities have been identified within or<br>contiguous to the District's Sphere of<br>Influence as defined in Section 56033.5 of   |
| 3. | Present and planned capacity of public<br>facilities and adequacy of public services,<br>including infrastructure needs or<br>deficiencies including needs or<br>deficiencies related to sewers, municipal<br>and industrial water, and structural fire<br>protection in any disadvantaged,<br>unincorporated communities within or<br>contiguous to the sphere of influence | the CKH Act.<br>The District relies on volunteer labor force. A<br>fire facilities fee study was completed in 2010<br>that noted that although the District's<br>volunteers sleep at Fire Station No. 1<br>overnight to improve response times, there<br>are no separate sleeping quarters. The study<br>also recommended a facilities master plan.<br>The District did not provide an update to<br>verify if changes have been made based on<br>the study. |
| 4. | Financial ability of agencies to provide services  | As a result of the 2010 study, a fire facilities<br>impact fee was adopted for the District. The<br>District also receives funding through a<br>special assessment that was approved in<br>1986. Per capita revenues are below the<br>regional average. According to the State<br>Controller's office, the latest reported<br>revenue for the District is \$177,348, which<br>was reported in 2020.   |
| 5. | Status of, and opportunities for, shared facilities  | The District is currently involved in automatic<br>aid with other Districts which improves<br>efficiency and effectiveness.   |
| 6. | Accountability for community service<br>needs, including governmental structure<br>and operational efficiencies  | The District is governed by a Board of<br>Directors comprised of 5 members. Each<br>Board Member is appointed by the Board of<br>Supervisors and serve a three-year term,<br>with a two-term limitation.<br>LAFCO staff has attempted to contact the<br>District on many occasions through mail,<br>email and telephone but has been<br>unsuccessful.   |
| 7. | Any other matter related to effective or<br>efficient service delivery, as required by<br>Commission policy  | None at this time.  |

#### SPHERE OF INFLUENCE UPDATE DETERMINATIONS AND RECOMMENDATIONS MOUNTAIN VIEW FIRE PROTECTION DISTRICT

|    | FACTORS TO BE ADDRESSED  | DETERMINATION  |
|----|--|--|
| 1. | The present and planned land uses in the area, including agricultural and open-<br>space lands   | The current area of the Mountain View Fire<br>Protection District is approximately 31,026<br>acres and is generally located south of Monte<br>Vista Avenue, between the San Joaquin River<br>and Union Pacific Railway. Land uses within<br>the district include agricultural and vacant<br>land. The Stanislaus County General Plan<br>identifies the entire area within the District's<br>boundaries as Agriculture. This designation is<br>not expected to change near future.<br>Additionally, there are no changes in the<br>planned land uses in the District as a result of<br>this review. |
| 2. | Present and probable need for public facilities and services in the area   | No part of the District's boundary is within the<br>Sphere of Influence of a city, therefore the<br>District's Sphere of Influence is considered<br>non-diminishing. Based on present and<br>planned land uses, there is a continued need<br>for services in the area, although growth is<br>limited based on agricultural designations.   |
| 3. | Present capacity of public facilities and<br>adequacy of public services that the<br>agency provides or is authorized to<br>provide                    | The MSR section provides a discussion of the services provided by the District, their present capacities, and infrastructure needs. The District is currently involved in automatic aid which improves efficiency and effectiveness of services.   |
| 4. | The existence of any social or economic<br>communities of interest in the area if the<br>commission determines that they are<br>relevant to the agency | There are no known communities of interest in the area.  |

| 5. | For an update of a sphere of influence of a<br>city or special district that provides public<br>facilities or services related to sewers,<br>municipal and industrial water, or<br>structural fire protection, the present and<br>probable need for those public facilities<br>and services of any disadvantaged<br>unincorporated communities within the<br>existing sphere of influence | No Disadvantaged Unincorporated<br>Communities have been identified within or<br>contiguous to the District's Sphere of Influence<br>as defined in Section 56033.5 of the CKH Act.<br>Additional services, such as sewer and water,<br>are provided through other special districts or<br>by way of private systems. |  |
|----|---|--|--|
|    | RECOMMENDATION  |  |  |
|    | Durayant to Covernment Code Section 56425/i)/2) the Commission does hereby establish  |  |  |

Pursuant to Government Code Section 56425(i)(2), the Commission does hereby establish the functions and classes of services provided by the Mountain View Fire Protection District (FPD) as those specified in the California Health & Safety Code §13862. Based upon the information contained in this document, it is recommended that the Mountain View FPD Sphere of Influence be updated to affirm its current sphere, as shown on Map 10.

#### SUMMARY

The Oakdale Rural Fire Protection District is located in the northern portion of Stanislaus County. The district serves the unincorporated communities of Valley Home, Knights Ferry, East Oakdale and Northern County area. District boundaries surround the City of Oakdale; and, as such, portions are within the City of Oakdale's sphere of influence. Boundaries are adjacent to the Stanislaus Consolidated Fire Protection District and the San Joaquin County and Calaveras County lines.

## MUNICIPAL SERVICE REVIEW DETERMINATIONS

OAKDALE RURAL FIRE PROTECTION DISTRICT

|    | FACTORS TO BE ADDRESSED  | DETERMINATION   |
|----|--|---|
| 1. | Growth and population projection for the affected area   | The District's territory includes the<br>unincorporated communities of Valley Home,<br>Knights Ferry, East Oakdale and the northern<br>most portions of the County. Significant<br>growth is not anticipated in these<br>communities. A small portion of the District's<br>territory is currently overlapped by the City of<br>Oakdale's Sphere of Influence, where the<br>City projects modest growth may occur over<br>the next 20 years.   |
| 2. | The location and characteristics of any<br>disadvantaged unincorporated<br>communities within or contiguous to the<br>sphere of influence  | No Disadvantaged Unincorporated<br>Communities have been identified within or<br>contiguous to the District's Sphere of<br>Influence as defined in Section 56033.5 of<br>the CKH Act.   |
| 3. | Present and planned capacity of public<br>facilities and adequacy of public services,<br>including infrastructure needs or<br>deficiencies including needs or<br>deficiencies related to sewers, municipal<br>and industrial water, and structural fire<br>protection in any disadvantaged,<br>unincorporated communities within or<br>contiguous to the sphere of influence | The District has entered into a full contract for<br>services with the Modesto City Fire<br>Department as of July of 2019. The contract<br>for services model has been successful with<br>the City of Modesto and the District will<br>evaluate its contract at the end of the 5-year<br>term in 2027.  |
| 4. | Financial ability of agencies to provide services  | The District currently collects a special tax<br>and fire facilities impact fees. According to<br>the District's most recent audit, there are<br>concerns that general expenses continue to<br>outpace the increases in revenue sources.<br>In 2020, the District's Board held a Special<br>Election requesting voters approve an<br>increase in the special assessment on all<br>parcels in the District to provide funding to<br>enable the District to operate two Fire<br>Stations with full staffing. The tax measure<br>was defeated. The District has looked into<br>generating additional revenues from fire<br>recovery. |
| Б  | Status of, and opportunities for, shared facilities  | The District currently contracts for fire protection services with the City of Modesto.   |

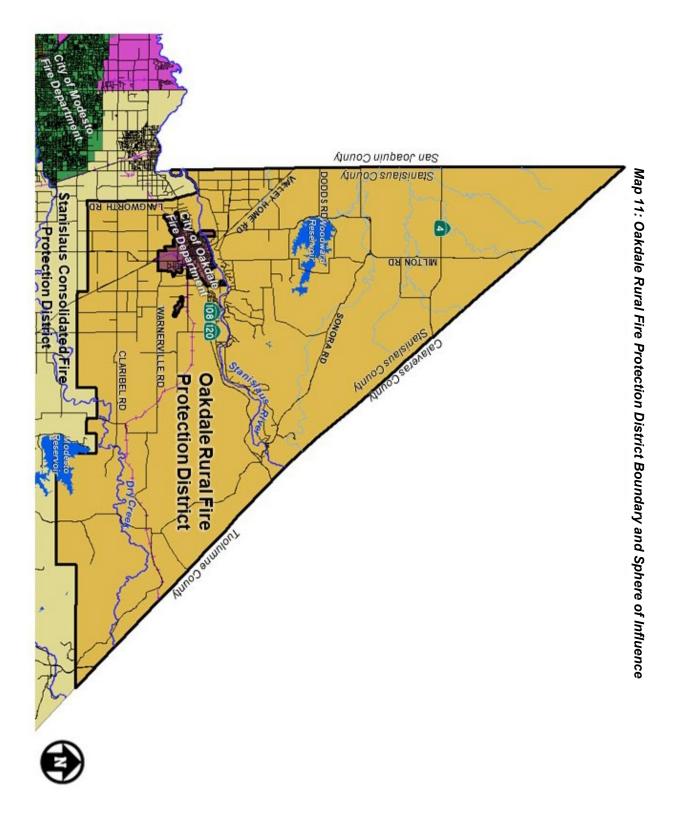

| 6. | Accountability for community service<br>needs, including governmental structure<br>and operational efficiencies | The District is governed by a Board of<br>Directors comprised of 5 members. Each<br>Board Member is appointed by the Board of<br>Supervisors and serves a three-year term,<br>with a two-term limitation. |
|----|---|---|
| 7. | Any other matter related to effective or<br>efficient service delivery, as required by<br>Commission policy     | None at this time.  |

#### SPHERE OF INFLUENCE UPDATE DETERMINATIONS AND RECOMMENDATIONS OAKDALE RURAL FIRE PROTECTION DISTRICT

| 1  |  |   |
|----|--|---|
|    | FACTORS TO BE ADDRESSED  | DETERMINATION   |
| 1. | The present and planned land uses in the area, including agricultural and open-space lands   | The majority of the District's territory is<br>currently designated Agriculture on the<br>County's General Plan. The existing<br>unincorporated communities of Valley Home,<br>Knights Ferry, and East Oakdale, are also<br>within the District's boundary and sphere of<br>influence, although little to no growth is<br>planned in these areas. A portion of the<br>District is overlapped by the City of Oakdale's<br>Sphere of Influence. Due to this overlap, the<br>District has historically had what is referred to<br>as a diminishing sphere of influence, as<br>Commission policies generally prefer that as<br>areas are annexed to the City of Oakdale,<br>they are detached from the District. In 2015,<br>an exception to this occurred, as the City and<br>District negotiated an agreement that<br>provided for annexation without detachment. |
| 2. | Present and probable need for public facilities and services in the area   | The need for fire protection services in the<br>area is not expected to diminish. The District<br>has recognized that expansion of areas<br>around the City of Oakdale will create an<br>increased demand for services and as such<br>has negotiated an agreement with the City of<br>Oakdale's Fire Department regarding future<br>jurisdictional changes.   |
| 3. | Present capacity of public facilities and<br>adequacy of public services that the<br>agency provides or is authorized to provide                       | The District has indicated that is has the ability to accommodate current and future development within its service boundaries.   |
| 4. | The existence of any social or economic<br>communities of interest in the area if the<br>commission determines that they are<br>relevant to the agency | The unincorporated communities of Valley<br>Home, Knights Ferry, and East Oakdale may<br>be considered communities of interest in the<br>area. The entirety of these communities fall<br>within the existing boundaries of the District.  |

| 5. | For an update of a sphere of influence of a<br>city or special district that provides public<br>facilities or services related to sewers,<br>municipal and industrial water, or structural<br>fire protection, the present and probable<br>need for those public facilities and services<br>of any disadvantaged unincorporated<br>communities within the existing sphere of<br>influence | As there are no known disadvantaged<br>unincorporated communities within the<br>District's Sphere of Influence, this factor is not<br>applicable. |  |
|----|---|---|--|
|    | RECOMMENDATION  |   |  |
|    |   |   |  |

information contained in this document, it is recommended that the Oakdale Rural FPD Sphere of Influence be updated to affirm its current sphere, as shown on Map 11.

# 5.9 SALIDA FIRE PROTECTION DISTRICT

#### SUMMARY

The Salida Fire Protection District is located south of the Stanislaus River, west of McHenry Avenue, and north of Shoemake Avenue. The district is adjacent to the northwesterly portion of the city of Modesto and includes the unincorporated community of Salida, the largest in Stanislaus County. Portions of the district's boundaries are within the City of Modesto's Sphere of Influence. The district is adjacent to the Stanislaus Consolidated and Woodland Avenue Fire Protection Districts. The District is currently being served by the City of Modesto for fire protection services.

## MUNICIPAL SERVICE REVIEW DETERMINATIONS

SALIDA FIRE PROTECTION DISTRICT

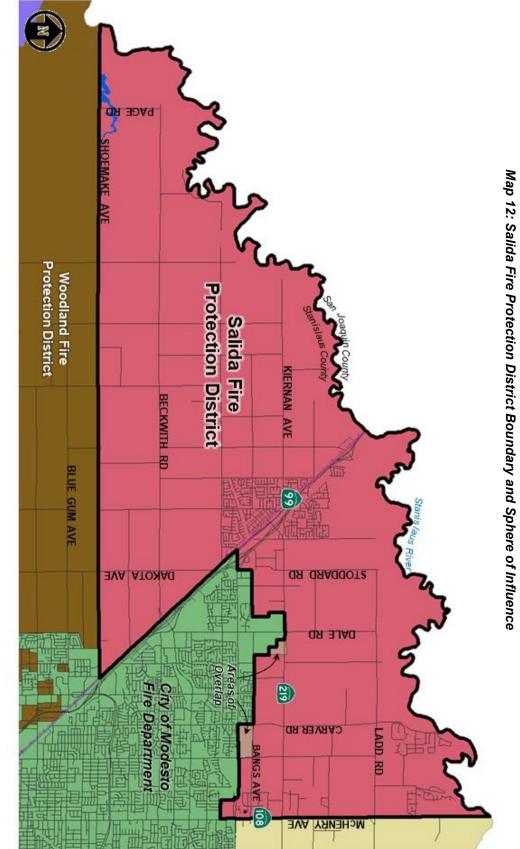

|    | FACTORS TO BE ADDRESSED  | DETERMINATION   |
|----|--|---|
| 1. | Growth and population projection for the affected area   | The District includes the communities of<br>Salida and Del Rio. Stanislaus County has<br>adopted a large-scale Salida Community Plan<br>area; however, development of the plan has<br>been constrained by the need for preparation<br>of environmental review.  |
| 2. | The location and characteristics of any disadvantaged unincorporated communities within or contiguous to the sphere of influence   | No Disadvantaged Unincorporated<br>Communities have been identified within or<br>contiguous to the District's Sphere of Influence<br>as defined in Section 56033.5 of the CKH Act.  |
| 3. | Present and planned capacity of public<br>facilities and adequacy of public<br>services, including infrastructure needs<br>or deficiencies including needs or<br>deficiencies related to sewers, municipal<br>and industrial water, and structural fire<br>protection in any disadvantaged,<br>unincorporated communities within or<br>contiguous to the sphere of influence | It is uncertain when full build-out of the Salida<br>Community Plan will occur, however, until<br>such time; services will continue to be needed<br>at the current demand. Development of the<br>area and intensity of land use will increase<br>calls and workload.<br>The District is currently only staffing one of<br>three stations. Currently the Ciccarelli station<br>is not staffed. The station was built in its<br>location in anticipation of growth, which has<br>not taken place. The station on Ladd Road is<br>currently being leased to a private business.<br>The District has a contract with the City of<br>Modesto for fire protection services. |
| 4. | Financial ability of agencies to provide services.   | The District continues to see only a very<br>moderate increase in property tax revenues<br>from year to year.<br>The District has a Community Facilities District<br>to generate additional revenues.   |
|    |  | The District is currently charging impact fees<br>for new fire facilities, vehicle accident<br>responses and other services charges.  |

| 5. | Status of, and opportunities for, shared facilities.   | The District has contracted with the Modesto<br>Fire Department for fire protection services.<br>The agreement is for five years and was<br>executed in September of 2022.<br>The District is currently sharing a joint facility<br>with the Stanislaus County Sherriff's Office at<br>Station 12 located at 4820 Salida Boulevard.   |
|----|--|---|
| 6. | Accountability for community service needs, including governmental structure and operational efficiencies.   | The District is governed by a Board of<br>Directors comprised of 5 members. Each<br>Board Member is elected and must reside<br>within the boundaries of the District. Directors<br>serve one 4-year term.   |
| 7. | Any other matter related to effective or<br>efficient service delivery, as required by<br>Commission policy. | Portions of the District south of Kiernan<br>Avenue are within the City of Modesto Sphere<br>of Influence. The District has identified<br>concerns with the City's growth in these areas<br>and a desire for non-detachment from the<br>District upon City annexation. Two areas<br>proceeded without detachment during a time<br>period in which the District and City were part<br>of a Joint Powers Authority (JPA). The JPA<br>has since been terminated. |
|    |  | The Salida FPD is in a five-year contract with<br>Modesto Fire Department (MFD). The prior<br>staffing model when Salida was on its own<br>was an engine company with two personnel<br>with limited to no additional backup personnel<br>or chief officer coverage. Today, Fire Station<br>12 is staffed by three personnel and has chief<br>officer coverage 24/7.   |
|    |  | Portions of the District are covered by MFD<br>Stations 11 and 6 as first-in units that respond<br>as the closest resource or as a second-engine<br>response. On a residential working fire, the<br>response includes five engine companies, one<br>truck company along with two chief officers<br>24/7. Commercial fire response will include the<br>aforementioned along with an additional truck<br>company.   |

#### SPHERE OF INFLUENCE UPDATE DETERMINATIONS AND RECOMMENDATIONS SALIDA FIRE PROTECTION DISTRICT

|    | FACTORS TO BE ADDRESSED  | DETERMINATION   |
|----|--|---|
| 1. | The present and planned land uses in the area, including agricultural and open-space lands | The current area of the Salida Fire Protection<br>District is approximately 26,723 acres and is<br>generally located south of the Stanislaus River,<br>west of McHenry Avenue, and north of<br>Shoemake Avenue. The District includes the<br>communities of Salida, Del Rio, the rural<br>community of Wood Colony and a portion of<br>area located within the Modesto Sphere of<br>Influence (SOI). Land uses within the District<br>include existing residential, commercial, and<br>industrial uses, as well as agricultural and<br>vacant land. The Stanislaus County General<br>Plan identifies the majority of the area as<br>agriculture, with more urbanized designations<br>within the community of Salida and the North<br>McHenry area. The vast majority of new<br>development in the District is expected to<br>occur in the Salida Community Plan area,<br>which allows for residential, commercial,<br>industrial, and business park development on<br>lands currently designated agriculture,<br>adjacent to the existing unincorporated<br>community of Salida. There are no changes in<br>the planned land uses in the District as a result<br>of this review. The responsibility for land use<br>decisions within the District boundaries is<br>retained by Stanislaus County. |
| 2. | Present and probable need for public facilities and services in the area                   | Part of the District's boundary is within the<br>Sphere of Influence of a city, therefore the<br>District's Sphere of Influence is considered<br>diminishing. It is uncertain when full build-out<br>of the Salida Community Plan will occur.<br>However and until such time, services will<br>continue to be provided supporting the current<br>level of service. Development of the area and<br>intensity of land use will increase calls and<br>workload. The District is closely monitoring<br>plans for growth in the area and addresses the<br>probable need for facilities and services in its<br>Fire Service Master / Strategic Plan (Dec.<br>2004) and Fire Facilities Impact Fee Study<br>(January 2023). The District remains proactive<br>in its plans to address growth and increased<br>demand in the area.  |

| 3. | Present capacity of public facilities and<br>adequacy of public services that the<br>agency provides or is authorized to<br>provide   | The MSR section provides a discussion of the<br>services provided by the District, their present<br>capacities, and infrastructure needs. The<br>District is currently staffed with volunteers and<br>full-time personnel. A "Fire Facilities Impact<br>Fee Study" was completed in early 2023,<br>which has led to an amendment to the<br>District's fees imposed on new development in<br>the area.   |  |
|----|---|---|--|
| 4. | The existence of any social or economic<br>communities of interest in the area if the<br>commission determines that they are<br>relevant to the agency  | As mentioned, the District includes the<br>community of Salida, which is expected to<br>experience significant growth. The District also<br>includes the Del Rio area, which is expected to<br>experience a small amount of growth on the<br>remaining lots in the area. The District also<br>includes the west side of the North McHenry<br>corridor, which contains a variety of Planned<br>Development and Planned Industrial<br>designations, most of which fall within the<br>Sphere of Influence of Modesto. Annexation<br>without detachment is of utmost interest to the<br>District. |  |
| 5. | For an update of a sphere of influence of a<br>city or special district that provides public<br>facilities or services related to sewers,<br>municipal and industrial water, or<br>structural fire protection, the present and<br>probable need for those public facilities<br>and services of any disadvantaged<br>unincorporated communities within the<br>existing sphere of influence   | No Disadvantaged Unincorporated<br>Communities have been identified within or<br>contiguous to the District's Sphere of Influence<br>as defined in Section 56033.5 of the CKH Act.<br>Additional services, such as sewer and water,<br>are provided through other special districts or<br>by way of private systems.  |  |
|    | RECOM   | MENDATION   |  |
|    | Pursuant to Government Code Section 56425(i)(2), the Commission does hereby establish<br>the functions and classes of services provided by the Salida Fire Protection District (FPD)<br>those specified in the California Health & Safety Code §13862. Based upon the informatio<br>contained in this document, it is recommended that the Salida FPD Sphere of Influence be<br>updated to affirm its current sphere, as shown on Map 12. |   |  |

# 5.10 STANISLAUS CONSOLIDATED FIRE PROTECTION DISTRICT

Address: 3324 Topeka St. City/Zip/State: Riverbank, CA 95367 Phone: 209-869-7470 Fire Chief: Email: Website: Tim Tietjen cbray@scfpd.us www.scfpd.us

#### SUMMARY

The Stanislaus Consolidated Fire Protection District is located in the central to eastern portion of Stanislaus County. The District stretches from the eastern edge of McHenry Avenue east to the county lines of Tuolumne, Mariposa and Merced. The District also touches the southern edge of San Joaquin County. The District services the cities of Riverbank and Waterford, as well as the unincorporated communities of Empire, Hickman, and La Grange. It also includes portions of the Stanislaus and Tuolumne rivers as well as Turlock and Modesto Reservoirs. The District includes territory within the City of Modesto's Sphere of Influence, including the Beard Industrial Tract, the Airport Neighborhood, and Empire. The Stanislaus Consolidated Fire Protection District was formed in 1995 with the consolidation of the Riverbank, Empire, Waterford-Hickman Fire Protection Districts and Stanislaus County Fire Department. The District boundaries are adjacent to the City of Modesto, City of Oakdale, City of Ceres as well as the Fire Protection Districts of Salida, Hughson, Oakdale and Denair.

#### PROFILE

| Board of Directors:            | Jonathan Goulding, Charles E. Neal, Brandon<br>Rivers, Gregory M. Bernardi, and Steven<br>Stanfield  | 2 |
|--------------------------------|--|---|
| Qualifications:                | Riverbank and Waterford City Councils each<br>appoint one (1). Stanislaus County Board of<br>Supervisors appoint one (1) from Empire area,<br>one (1) from District 1 and one (1) from District 2.<br>Board members are required to file Conflict of<br>Interest Disclosure Statements. Board members<br>receive \$100.00 per meeting. |   |
| Meeting Schedule:<br>Location: | Second Thursday of each month at 6:00 p.m.<br>3324 Topeka St. in Riverbank, California 95367   |   |

## MUNICIPAL SERVICE REVIEW DETERMINATIONS

## STANISLAUS CONSOLIDATED FIRE PROTECTION DISTRICT

|    | FACTORS TO BE ADDRESSED  | DETERMINATION   |
|----|--|---|
| 1. | Growth and population projection for the affected area   | Portions of the District are overlapped by the<br>spheres of influence of the City of Modesto,<br>City of Riverbank and City of Waterford. The<br>majority of growth within the District is in the<br>Riverbank area.   |
| 2. | The location and characteristics of any<br>disadvantaged unincorporated<br>communities within or contiguous to the<br>sphere of influence  | Based on annual median household income,<br>the Airport Neighborhood in the City of<br>Modesto area and the town of Empire are<br>identified as a Disadvantaged Unincorporated<br>Community (DUC) as defined in Section<br>56033.5 of the Cortese-Knox-Hertzberg Act of<br>2000. No additional DUCs have been<br>identified within or contiguous to the District's<br>sphere of influence   |
| 3. | Present and planned capacity of public<br>facilities and adequacy of public services,<br>including infrastructure needs or<br>deficiencies including needs or<br>deficiencies related to sewers, municipal<br>and industrial water, and structural fire<br>protection in any disadvantaged,<br>unincorporated communities within or<br>contiguous to the sphere of influence | The District has identified concerns related to<br>the impact of future development. The<br>District is in the process of working on a plan<br>to identify any future infrastructure, fire station<br>(in Riverbank) and capital equipment needs<br>that would be required to serve future<br>development and will actively pursue<br>mitigation measures to ensure a high level of<br>fire protection is available for all current and<br>future demands in the District.<br>Currently, the District's critical need for the<br>district is the replacement of apparatus.<br>Additionally, the District is working with the<br>City of Modesto to develop a new Standards<br>of Coverage Plan. The District is also in the<br>process of purchasing a new type-1 fire<br>engine and has the need for at least two more |
| 4. | Financial ability of agencies to provide services  | new type-1 engines.<br>The District collects development fees that<br>are used to upgrade and improve equipment,<br>apparatus, and facilities. A benefit<br>assessment was passed by voters in 2005<br>that created various assessment rates for<br>different occupancies and land uses<br>throughout the District. The District's Benefit<br>Assessment is the main source of revenue for<br>the ability to provide services. The District is<br>exploring user fees, fire recovery fees,<br>development impact fees, CEQA fees, and<br>Prop 172 for additional revenue streams to   |

| F  | Statue of and apportunities for abored  | provide services within future growth areas of<br>the District. The District requires 15 percent<br>of total budget held as reserve. The District is<br>meeting its current reserve goals.   |
|----|---|--|
| 5. | Status of, and opportunities for, shared facilities   | The District maintains a mutual aid<br>agreement with CalFire and automatic aid<br>agreements with City of Modesto, City of<br>Turlock and Stanislaus County. The District<br>is also part of several joint powers authorities<br>(JPAs) including SR911, Fire Districts<br>Association of California Employment<br>Benefits Authority (FDAC EBA), and<br>Stanislaus County Fire Authority. The District<br>is currently has a fire administrative contract<br>with the City of Modesto and is currently<br>continuing to explore a full-service fire<br>contract.   |
|    |   | In 2014, the District entered into a contract for<br>service with Oakdale Fire Protection District<br>and Oakdale City to provide fire protection<br>services. In 2019, both the Oakdale Fire<br>Protection District and City of Oakdale began<br>receiving services from the City of Modesto<br>for fire protection services, thus ending their<br>contract with Stanislaus Consolidated Fire<br>Protection District.   |
|    |   | Also, in November 2015, the District<br>implemented its Resource Sharing Borderless<br>Boundaries for Emergency Response<br>Program. This program provides the closest<br>resource dispatching concept regardless of<br>the jurisdiction. Participating agencies include<br>Stanislaus Consolidated Fire Protection<br>District, Modesto Fire Department, Ceres Fire<br>Department and Turlock City Fire<br>Department. As the program moves forward<br>into the future, the participating agencies will<br>be furthering efficiencies of the program in the<br>areas of joint training programs, centralized<br>purchasing and procurement as well as joint<br>facilities within service areas that closely<br>border each other. |
| 6. | Accountability for community service<br>needs, including governmental structure<br>and operational efficiencies | The District is governed by a Board of<br>Directors comprised of 5 members. One<br>Director is appointed by the City of Riverbank,<br>One is Directed by the City of Waterford, One<br>is appointed by the Board of Supervisors and<br>must reside in the old Empire Fire Protection<br>District and two public members-at-large that<br>reside within the district and are appointed by   |

|    |   | the Board of Supervisors. Each Director<br>serves a 2-year term with a limit of 2 terms. |
|----|---|--|
| 7. | Any other matter related to effective or<br>efficient service delivery, as required by<br>Commission policy | None at this time.   |

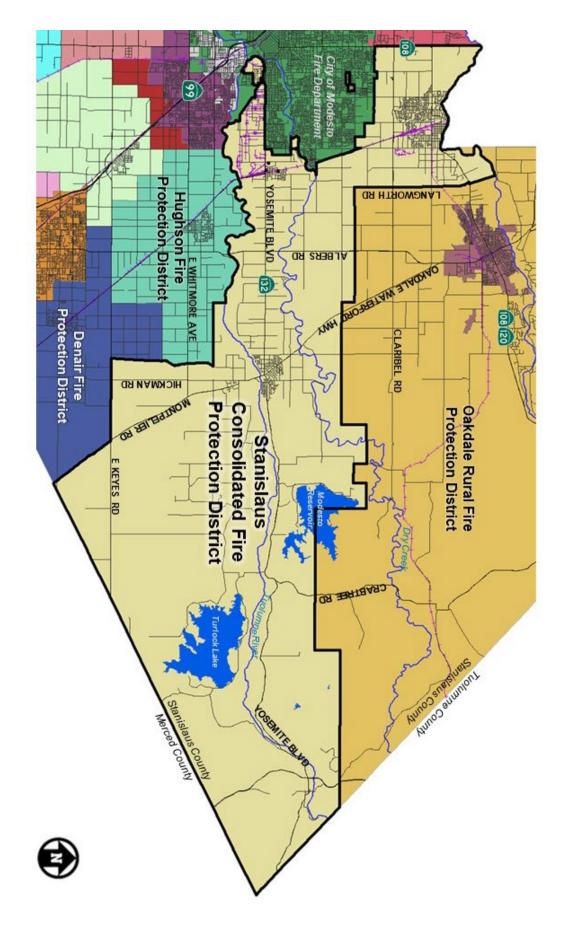

## SPHERE OF INFLUENCE UPDATE DETERMINATIONS AND RECOMMENDATIONS

STANISLAUS CONSOLIDATED FIRE PROTECTION DISTRICT

|    | FACTORS TO BE ADDRESSED  | DETERMINATION  |
|----|--|--|
| 1. | The present and planned land uses in the area, including agricultural and open-space lands | The current area of the Stanislaus<br>Consolidated Fire Protection District is<br>approximately 199 square miles (or 127,360<br>acres) and is generally located in the portion<br>of the County stretching from McHenry<br>Avenue to the Stanislaus-Merced-Tuolumne-<br>Calaveras County Lines. The District was<br>formed in 1995, as a consolidation of the<br>former Riverbank, Empire, and Waterford-<br>Hickman Fire Protection Districts. It includes<br>the cities of Riverbank and Waterford, as well<br>as the unincorporated communities of<br>Empire, Hickman, and La Grange. The<br>District's boundary also includes Turlock Lake<br>and portions of the Modesto Reservoir. Land<br>uses within the District include agricultural<br>and vacant land, as well existing residential,<br>commercial, and industrial areas. The<br>Stanislaus County General Plan identifies the<br>majority of the area as agriculture, while more<br>urbanized designations fall in the community<br>areas and City's General Plans. There are no<br>changes in the planned land uses in the<br>District as a result of this review. The<br>responsibility for land use decisions within the<br>District boundaries is retained by Stanislaus<br>County, and the cities of Riverbank and<br>Waterford. |
| 2. | Present and probable need for public facilities and services in the area                   | Until such time as the cities of Riverbank and<br>Waterford annex the lands within their<br>Spheres of Influence, services will continue to<br>be needed at the current service demand.<br>Annexation of these areas and intensity of<br>land use in the area will increase the District's<br>calls for service as well as workload. Due to<br>the District's diminishing sphere, annexation<br>of those areas overlapped by the City of<br>Modesto's Sphere of Influence, have<br>historically led to detachments from the<br>District and a loss of revenues in the affected<br>area. The District has stated its intent to seek<br>alternative arrangements, including non-<br>detachment and revenue-sharing agreements<br>for future annexations.   |

| 5. Fo<br>fa<br>fir<br>fa | The existence of any social or economic<br>ommunities of interest in the area if the<br>ommission determines that they are<br>elevant to the agency   | As stated above, the District covers the cities<br>of Riverbank and Waterford, as well as three<br>unincorporated areas. Within the portion of<br>the District that overlaps the City of Modesto<br>Sphere of Influence is located an industrial  |  |
|--------------------------|---|---|--|
| cit<br>fa<br>m<br>fir    |   | park known as the Beard Industrial Tract,<br>which can also be considered a community of<br>interest.   |  |
| cc                       | for an update of a sphere of influence of a<br>ity or special district that provides public<br>acilities or services related to sewers,<br>nunicipal and industrial water, or structural<br>re protection, the present and probable<br>eed for those public facilities and services<br>f any disadvantaged unincorporated<br>ommunities within the existing sphere of<br>nfluence | The Airport Neighborhood and town of<br>Empire are identified as Disadvantaged<br>Unincorporated Communities (DUCs) as<br>defined in Section 56033.5 of the Cortese-<br>Knox-Hertzberg Act of 2000. The District will<br>need to relocate the Empire Fire Station<br>within that service area to maintain adequate<br>service once future upgrades and widening<br>occurs to State Route 132 / Yosemite Blvd.<br>Additional Fires Stations will need to be<br>placed within the Riverbank Service Area<br>particularly on the West side of Oakdale<br>Road and on the East side of Claus Road<br>once these areas have been approved for<br>annexation and future development is<br>approved. Additional services, such as sewer<br>and water are provided through other special<br>districts or by way of private systems. |  |
|                          | RECOMM  | IENDATION   |  |
|                          | Pursuant to Government Code Section 56425(i)(2), the Commission does hereby establish the functions and classes of services provided by the Stanislaus Consolidated Fire  |   |  |

Protection District (FPD) as those specified in the California Health & Safety Code §13862. Based upon the information contained in this document, it is recommended that the Stanislaus Consolidated FPD Sphere of Influence be updated to affirm its current sphere, as shown on Map 13.

# 5.11 TURLOCK RURAL FIRE PROTECTION DISTRICT

Address: City/State/Zip: Phone: 690 W. Canal Dr. Turlock, CA 95380-3821 209-678-1939

Fire Chief: Email: Nicholas Colbert ncolbert@turlockruralfire.org

#### SUMMARY

The Turlock Rural Fire Protection District is located south and west of the City Turlock, stretching to the Stanislaus-Merced County line. The district includes territory which is within the City of Turlock's Sphere of Influence. The District is adjacent to the Keyes, Denair, and Mountain View Fire Protection Districts.

#### PROFILE

| Board of Directors: | Brad Koehn, Brian Genzoli, Allen Peterson, Frank Buster Lucas and     |
|---------------------|---|
|                     | Richard Fortado   |
| Qualifications:     | Appointed by the Board of Supervisors. Board members are required to  |
|                     | file Conflict of Interest Disclosure Statements. Board members do not |
|                     | receive compensation to attend Board meetings.                        |
| Meeting Schedule:   | Second Thursday of each month at 5:30 p.m.                            |
| Location:           | Fire Station 46   |

### **MUNICIPAL SERVICE REVIEW DETERMINATIONS** TURLOCK RURAL FIRE PROTECTION DISTRICT

|    | FACTORS TO BE ADDRESSED  | DETERMINATION  |
|----|--|--|
| 1. | Growth and population projection for the affected area   | Portions of the District are within the City of<br>Turlock SOI. At this time, significant growth is<br>not anticipated within the district.  |
| 2. | The location and characteristics of any<br>disadvantaged unincorporated<br>communities within or contiguous to the<br>sphere of influence  | Although the Census data identifies lower<br>income areas within the District, no specific<br>Disadvantaged Unincorporated Communities<br>have been identified within or contiguous to<br>the District's Sphere of Influence as defined in<br>Section 56033.5 of the CKH Act.  |
| 3. | Present and planned capacity of public<br>facilities and adequacy of public<br>services, including infrastructure needs<br>or deficiencies including needs or<br>deficiencies related to sewers, municipal<br>and industrial water, and structural fire<br>protection in any disadvantaged,<br>unincorporated communities within or<br>contiguous to the sphere of influence | The District is not currently collecting<br>development fees. The District's headquarters<br>were remodeled in 1998. The District recently<br>purchased an adjacent parcel in advance of<br>expansion opportunities at its current location.<br>No additional stations or vehicles are planned<br>at this time.  |
| 4. | Financial ability of agencies to provide services  | The District performs an annual audit and<br>provides copies to the County and State are<br>requested. is currently in the process of<br>reviewing its special assessment.<br>The District does not collect impact fees and is<br>currently in the process of reviewing its special<br>assessments.<br>The District's per capita revenues are below<br>the regional average and it relies on a |
| 5. | Status of, and opportunities for, shared facilities  | volunteer labor force.<br>The District currently maintains mutual aid<br>agreements with direct neighboring agencies<br>and automatic aid agreements with direct<br>neighboring agencies for multi engine and<br>high hazard calls.  |
| 6. | Accountability for community service<br>needs, including governmental structure<br>and operational efficiencies  | The District is governed by a Board of<br>Directors comprised of 5 members. Each<br>Board Member is appointed by the Board of<br>Supervisors and serve a three-year term, with<br>a two-term limitation.   |
| 7. | Any other matter related to effective or<br>efficient service delivery, as required by<br>Commission policy.   | None at this time.   |

#### SPHERE OF INFLUENCE UPDATE DETERMINATIONS AND RECOMMENDATIONS TURLOCK RURAL FIRE PROTECTION DISTRICT

|    | FACTORS TO BE ADDRESSED   | DETERMINATION  |
|----|---|--|
| 1. | The present and planned land uses in the area, including agricultural and open-<br>space lands  | The current area of the Turlock Rural Fire<br>Protection District is approximately 12,266<br>acres and is generally located to the south and<br>west of the City of Turlock. A portion of the<br>District is within the City of Turlock's sphere of<br>influence, a large portion of which was<br>recently annexed to the City and detached<br>from the District. Land uses within the district<br>include agricultural, scattered residences, and<br>vacant land. There are no changes in the<br>planned land uses in the District as a result of<br>this review. |
| 2. | Present and probable need for public facilities and services in the area  | Based on present and planned land uses,<br>there is a continued need for services in the<br>area, although there is limited growth based<br>on agricultural designations.  |
| 3. | Present capacity of public facilities and<br>adequacy of public services that the<br>agency provides or is authorized to provide  | The MSR section provides a discussion of the services provided by the District, their present capacities, and infrastructure needs. The District currently relies on a volunteer labor force and has a "sleep-in" program to improve response capacity.  |
| 4. | The existence of any social or economic<br>communities of interest in the area if the<br>commission determines that they are<br>relevant to the agency  | There are no known communities of interest in<br>the area. However, it should be noted that<br>there are small portions of the District that are<br>completely surrounded by the city limits of<br>Turlock.  |
| 5. | For an update of a sphere of influence of a<br>city or special district that provides public<br>facilities or services related to sewers,<br>municipal and industrial water, or structural<br>fire protection, the present and probable<br>need for those public facilities and services<br>of any disadvantaged unincorporated<br>communities within the existing sphere of<br>influence   | No Disadvantaged Unincorporated<br>Communities have been identified within or<br>contiguous to the District's Sphere of Influence<br>as defined in Section 56033.5 of the CKH Act.<br>Additional services, such as sewer and water,<br>are provided through other special districts or<br>by way of private systems.   |
| 1  | RECOM   | MENDATION  |
|    | Pursuant to Government Code Section 56425(i)(2), the Commission does hereby establish<br>the functions and classes of services provided by the Turlock Rural Fire Protection District<br>(FPD) as those specified in the California Health & Safety Code §13862. Based upon the<br>information contained in this document, it is recommended that the Turlock Rural FPD<br>Sphere of Influence be updated to affirm its current sphere, as shown on Map 14. |  |

# 5.12 WEST STANISLAUS FIRE PROTECTION DISTRICT

Address: Mail: City/Zip/State: Phone:

344 W. Las Palmas Ave. P.O. Box 565 Patterson, CA 95363 209-895-8130

Fire Chief: Jeff Frye Contact: Email: Website:

Jeff Frye - Chief jfrye@pattersonca.us www.weststanfire.org

#### SUMMARY

The West Stanislaus Fire Protection District boundaries include the western portion of the County, located west of the San Joaquin River, excluding the cities of Patterson and Newman. Included in the District are the unincorporated communities of Grayson, Westley, Crows Landing, and Diablo Grande. The District is adjacent to the Woodland Avenue, Westport, and Mountain View Fire Protection Districts.

#### MUNICIPAL SERVICE REVIEW DETERMINATIONS

WEST STANISLAUS FIRE PROTECTION DISTRICT

| ,  | FACTORS TO BE ADDRESSED  | DETERMINATION  |
|----|--|--|
| 1. | Growth and population projection for the affected area   | The City of Patterson is one of the fastest<br>growing cities int Stanislaus County and is<br>projected to continue growing over the next<br>decade. The City of Newman is also<br>projected to grow over the next 10 years.<br>Stanislaus County is also moving forward<br>with the Crows Landing Industrial Business<br>Park which is located within the District's<br>territory. Growth is also anticipated in the<br>Diablo Grande Specific Plan. Phase one of<br>the Specific Plan includes 2,000 residences,<br>associated commercial uses, open space,<br>and recreational areas. The County has<br>issued approximately 450 building permits<br>for single family homes thus far in the area.  |
| 2. | The location and characteristics of any<br>disadvantaged unincorporated<br>communities within or contiguous to the<br>sphere of influence  | Based on annual median household income,<br>the towns of Grayson and Westley are<br>identified as a Disadvantaged<br>Unincorporated Community (DUC) as<br>defined in Section 56033.5 of the Cortese-<br>Knox-Hertzberg Act of 2000.  |
| 3. | Present and planned capacity of public<br>facilities and adequacy of public services,<br>including infrastructure needs or<br>deficiencies including needs or<br>deficiencies related to sewers, municipal<br>and industrial water, and structural fire<br>protection in any disadvantaged,<br>unincorporated communities within or<br>contiguous to the sphere of influence | The District has stated that the cities of<br>Patterson and Newman continue to grow<br>and annex portions of the Fire District. As a<br>result, the District will have less influence<br>and jurisdiction within the spheres of<br>influence of each city.<br>The District has stated that it must consider<br>updated MOUs or contracts for services that<br>may better serve the Fire District, similar to<br>the City of Modesto providing services for a<br>number of districts.<br>The District has also stated that a number of<br>stations should be relocated in order to<br>better serve the community.<br>Additional services, such as sewer and<br>water are provided through other special |
|    |  | water are provided through other special districts or by way of private systems.   |

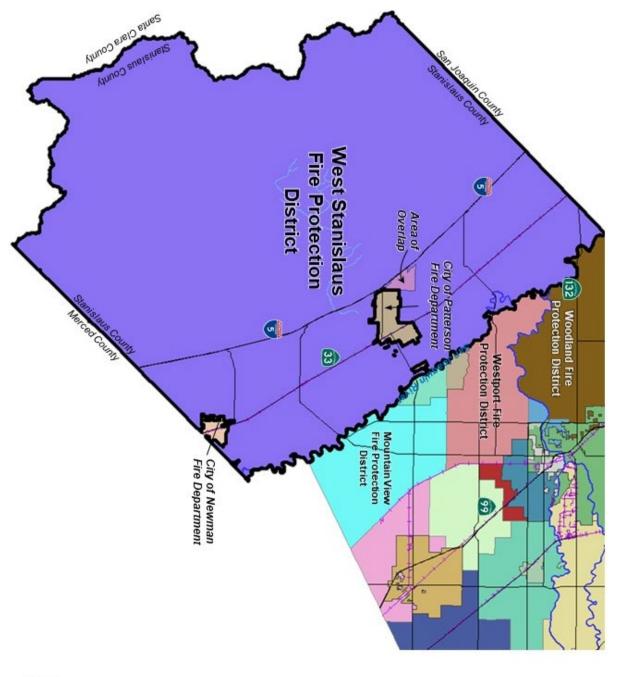

| 4. | Financial ability of agencies to provide services   | In 2021, the District's board adopted an<br>updated impact fee study which proposed<br>an increase in fire protection facility fees.<br>These fees are typically collected at the time<br>of new construction. The study along with<br>amended fees was approved in October of<br>2022 by the Stanislaus County Board of<br>Supervisors.<br>The District currently uses a bill for service<br>on motor vehicle collisions of non-residents.<br>This revenue source is minimal and<br>generates funding near \$15,000.00<br>annually.<br>The District does not maintain a policy on<br>reserves and regularly relies on carryover<br>balances from accounts. The District<br>regularly projects a deficit of \$400,000.00.<br>For the last few years, the District has had<br>to rely on carryover funds to supplement the<br>District budget. The long-term debts and<br>capital purchases have drawn down the<br>available funding for daily operations. The |
|----|---|---|
| 5. | Status of, and opportunities for, shared facilities | District has committed to developing a<br>formal policy once the District is able to<br>have funding to place in reserves.<br>The District relies heavily on mutual aid<br>agreements to provide services. As a   |
|    |   | volunteer agency, the District has no<br>guaranteed staffing and therefore is unable<br>to determine or meet the standard response<br>for working structure fires, vehicle collisions,<br>and vegetation fires.   |
|    |   | Currently, the District has MOUs with the<br>Cities of Newman and Patterson for shared<br>staffing. The District also has written mutual<br>aid agreements with the City of Newman,<br>California Department of Forestry and Fire<br>Protection, Merced County Fire Department,<br>and the City of Gustine Fire Department for<br>the southern portion of the District.   |
|    |   | The District has expressed interest in an<br>expanded MOU with the City of Patterson to<br>support facility and apparatus sharing,<br>similar to its agreement with the City of<br>Newman.  |

| 6. | Accountability for community service<br>needs, including governmental structure<br>and operational efficiencies | The District is governed by a Board of<br>Directors comprised of 5 members. Each<br>Board Member is appointed by the Board of<br>Supervisors and serves a three-year term,<br>with a two-term limitation.  |
|----|---|--|
| 7. | Any other matter related to effective or<br>efficient service delivery, as required by<br>Commission policy     | The District has stated that because of the current and recurring demands on fire and life safety services, retaining trained, experienced personnel is difficult. Those individuals often go to other agencies that are able to offer higher compensation, benefits, or better hours. t.<br>The District services remote areas including Del Puerto Canyon, San Joaquin River, and Frank Raines Park which can be difficult to access with standard apparatus, vehicles, and equipment.<br>The District also serves the Crows Landing, Westley, and Grayson areas. These areas often have narrow and long driveways or lack conspicuous identification. Roads are often dirt or unimproved. Trails and roads can also be overgrown with vegetation or trees which pose hazards. |

#### **SPHERE OF INFLUENCE UPDATE DETERMINATIONS AND RECOMMENDATIONS** WEST STANISLAUS FIRE PROTECTION DISTRICT

|    | FACTORS TO BE ADDRESSED  | DETERMINATION  |
|----|--|--|
| 1. | The present and planned land uses in the area, including agricultural and open-space lands | The current area of the West Stanislaus Fire<br>Protection District is approximately 391,077<br>acres (or 611 square miles) and includes the<br>western portion of the County, located west of<br>the San Joaquin River, excluding the cities of<br>Patterson and Newman. The District includes<br>the unincorporated communities of Grayson,<br>Westley, Crows Landing, and Diablo Grande.<br>Portions of the District fall within the Spheres<br>of Influence of Patterson and Newman. Land<br>uses within the District include agricultural<br>and vacant land, as well as existing<br>residential, commercial, and industrial areas.   |
|    |  | The Stanislaus County General Plan<br>identifies the majority of the area as<br>agriculture.   |
|    |  | With future development of the Crows<br>Landing Industrial Business Park, the District<br>anticipates a new fire station, new apparatus,<br>and staffing to meet the project demands.  |
|    |  | There are no changes in the planned land<br>uses in the District as a result of this review.<br>The responsibility for land use decisions<br>within the District boundaries is retained by<br>Stanislaus County.   |
| 2. | Present and probable need for public facilities and services in the area                   | The District currently cooperates with the<br>Patterson Fire Department, sharing<br>administrative staff. The District and<br>Patterson Fire Department share a full-time<br>fire chief and a fire station in Patterson,<br>though for governance purposes they are<br>separate entities. Until such time as the cities<br>of Patterson and Newman annex the lands<br>within the District, services to these areas will<br>continue to be needed at the current demand.<br>Annexation of the area and intensity of land<br>use in the area may increase calls and<br>workload. The District has historically had<br>what is referred to as a diminishing sphere of<br>influence, meaning that as annexations to<br>Patterson and Newman occurred, the areas<br>were simultaneously detached from the |

|    |   | District. In 2014, the District and City of<br>Patterson agreed to not detach the area and<br>instead share responsibilities and resources<br>in the annexed territory (Arambel-KDN<br>Business Park Reorganization). However,<br>subsequent annexations have been<br>proposed, including detachment from the<br>District.   |
|----|---|--|
| 3. | Present capacity of public facilities and<br>adequacy of public services that the<br>agency provides or is authorized to provide  | The MSR section provides a discussion of the<br>services provided by the District, their present<br>capacities, and infrastructure needs. The<br>District is currently able to provide services to<br>its territory. However, the District is struggling<br>to due to lack of funding. Much of the<br>District's facilities, and apparatus are in need<br>of repair and/or replacement. The District<br>has also struggled with losing qualified staff<br>to higher paying positions with other<br>agencies. |
| 4. | The existence of any social or economic<br>communities of interest in the area if the<br>commission determines that they are<br>relevant to the agency  | As mentioned, the District includes the<br>unincorporated communities of Grayson,<br>Westley, Crows Landing, and Diablo Grande<br>within its boundaries. The Crows Landing<br>Industrial Business Park is also considered<br>an area of interest, as the County is planning<br>development of the area which could lead to<br>a substantial increase in demand for fire<br>services in the area.   |
| 5. | For an update of a sphere of influence of a<br>city or special district that provides public<br>facilities or services related to sewers,<br>municipal and industrial water, or structural<br>fire protection, the present and probable<br>need for those public facilities and services<br>of any disadvantaged unincorporated<br>communities within the existing sphere of<br>influence | The towns of Grayson and Westley are<br>identified as Disadvantaged Unincorporated<br>Communities (DUCs) as defined in Section<br>56033.5 of the Cortese-Knox-Hertzberg Act<br>of 2000. The District will need additional<br>stations in the future. Additional services,<br>such as sewer and water are provided<br>through other special districts or by way of<br>private systems.  |
|    | RECOMM  | IENDATION  |
|    |   | 5(i)(2), the Commission does hereby establish<br>of by the West Stanislaus Fire Protection<br>rnia Health & Safety Code §13862. Based<br>pent, it is recommended that the West   |

# 5.13 WESTPORT FIRE PROTECTION DISTRICT

Address: City/Zip/State: Phone: 5160 S. Carpenter Rd. Modesto, CA 95358 209-537-1391 Fire Chief:Shanon EvansEmail:westportfire@outlook.comWebsite:Westportfire.specialdistrict.org

#### SUMMARY

The Westport Fire Protection District lies south of the City of Modesto and west of the City of Ceres. The western edge of the district lies along the San Joaquin River. The small unincorporated communities, commonly known as the Monterey Park Tract and the Cowan Tract, are within the district's boundaries. The district is adjacent to the West Stanislaus, Woodland Avenue, Industrial, Burbank-Paradise, Ceres, Keyes, Modesto and Mountain View Fire Protection Districts.

#### MUNICIPAL SERVICE REVIEW DETERMINATIONS WESTPORT FIRE PROTECTION DISTRICT

|    | FACTORS TO BE ADDRESSED  | DETERMINATION   |
|----|--|---|
| 1. | Growth and population projection for the affected area.  | Portions of the District are within the Cities of<br>Modesto and Ceres SOIs. At this time,<br>significant growth is not anticipated within the<br>district.   |
| 2. | The location and characteristics of any<br>disadvantaged unincorporated<br>communities within or contiguous to the<br>sphere of influence  | Based on annual median household income,<br>the Cowan Tract and Monterey Park Tract<br>communities are identified as a<br>Disadvantaged Unincorporated Community<br>(DUC) as defined in Section 56033.5 of the<br>Cortese-Knox-Hertzberg Act of 2000. No<br>additional DUCs have been identified within<br>or contiguous to the District's sphere of<br>influence |
| 3. | Present and planned capacity of public<br>facilities and adequacy of public<br>services, including infrastructure needs<br>or deficiencies including needs or<br>deficiencies related to sewers, municipal<br>and industrial water, and structural fire<br>protection in any disadvantaged,<br>unincorporated communities within or<br>contiguous to the sphere of influence | The District is considering a remodel of its<br>headquarters as well as replacement of a<br>Type I engine company in the future. The<br>District does not have a vehicle amortization<br>plan in effect. The District currently relies on<br>a volunteer labor force and has had<br>difficulties attracting and retaining volunteer<br>firefighters.              |
| 4. | Financial ability of agencies to provide services.   | The District's per capita revenues improved<br>substantially with the passing of Measure J, a<br>special assessment in 2016.  |
| 5. | Status of, and opportunities for, shared facilities  | Currently, the District trains with City of Ceres<br>and the Salida Fire Protection District.   |
| 6. | Accountability for community service<br>needs, including governmental structure<br>and operational efficiencies  | The District is governed by a Board of<br>Directors comprised of 5 members. Each<br>Board Member is elected by voters within the<br>District and serves a 4-year term.  |
| 7. | Any other matter related to effective or<br>efficient service delivery, as required by<br>Commission policy  | None at this time.  |

#### **SPHERE OF INFLUENCE UPDATE DETERMINATIONS AND RECOMMENDATIONS** WESTPORT FIRE PROTECTION DISTRICT

|    | FACTORS TO BE ADDRESSED  | DETERMINATION  |  |
|----|--|--|--|
| 1. | The present and planned land uses in the area, including agricultural and open-space lands   | The current area of the Westport Fire<br>Protection District is approximately 25,980<br>acres and is generally located south of the<br>City of Modesto and west of the City of<br>Ceres. The western edge of the district lies<br>along the San Joaquin River. Land uses<br>within the district include existing agricultural<br>and vacant land with scattered residences,<br>and small areas of commercial and industrial<br>within the City's sphere. There are no<br>changes in the planned land uses in the<br>District as a result of this review. |  |
| 2. | Present and probable need for public facilities and services in the area   | Based on present and planned land uses,<br>there is a continued need for services in the<br>area.  |  |
| 3. | Present capacity of public facilities and<br>adequacy of public services that the<br>agency provides or is authorized to provide   | The MSR section provides a discussion of the services provided by the District, their present capacities, and infrastructure needs. The District currently relies on a volunteer labor force.  |  |
| 4. | The existence of any social or economic communities of interest in the area if the commission determines that they are relevant to the agency.   | The Monterey Park Tract and the Cowan<br>Tract are within the District's boundaries and<br>can be considered communities of interest in<br>the area.   |  |
| 5. | For an update of a sphere of influence of a<br>city or special district that provides public<br>facilities or services related to sewers,<br>municipal and industrial water, or structural<br>fire protection, the present and probable<br>need for those public facilities and services<br>of any disadvantaged unincorporated<br>communities within the existing sphere of<br>influence.   | The Cowan and Monterey Park Tracts are<br>identified as Disadvantaged Unincorporated<br>Communities (DUCs) as defined in Section<br>56033.5 of the Cortese-Knox-Hertzberg Act<br>of 2000. The District has contracted for the<br>replacement of a Type I engine company and<br>is expecting delivery Fall 2023. Additional<br>services, such as sewer and water are<br>provided through other special districts or by<br>way of private systems.   |  |
|    | RECOMM   | IENDATION  |  |
|    | Pursuant to Government Code Section 56425(i)(2), the Commission does hereby estal<br>the functions and classes of services provided by the Westport Fire Protection District<br>(FPD) as those specified in the California Health & Safety Code §13862. Based upon<br>information contained in this document, it is recommended that the Westport FPD Sphe<br>Influence be updated to affirm its current sphere, as shown on Map 16. |  |  |

Map 16: Westport Fire Protection District Boundary and Sphere of Influence

# 5.14 WOODLAND AVENUE FIRE PROTECTION DISTRICT

Address: City/Zip/State: Phone: 3300 Woodland Ave. Modesto, CA 95358 209-524-4239 Fire Chief: Email:

Mike Passalaqua wafpd@comcast.net

#### SUMMARY

Woodland Avenue Fire Protection District is located north of the Tuolumne River and west of the City of Modesto. District boundaries include six small areas surrounded by the Modesto city limits. The easterly portion of the District is within the City of Modesto's Sphere of Influence. The boundaries are adjacent to the Salida, Burbank-Paradise, Westport, and West Stanislaus Fire Protection Districts.

## MUNICIPAL SERVICE REVIEW DETERMINATIONS

WOODLAND AVENUE FIRE PROTECTION DISTRICT

| ĺ  |  |  |
|----|--|--|
|    | FACTORS TO BE ADDRESSED  | DETERMINATION  |
| 1. | Growth and population projection for the affected area   | Portions of the District are within the City of<br>Modesto SOI. At this time, significant<br>growth is not anticipated within the district.  |
| 2. | The location and characteristics of any<br>disadvantaged unincorporated<br>communities within or contiguous to the<br>sphere of influence  | Based on annual median household income,<br>portions of unincorporated West Modesto<br>are identified as a Disadvantaged<br>Unincorporated Community (DUC) as<br>defined in Section 56033.5 of the Cortese-<br>Knox-Hertzberg Act of 2000. No additional<br>DUCs have been identified within or<br>contiguous to the District's sphere of<br>influence.  |
| 3. | Present and planned capacity of public<br>facilities and adequacy of public services,<br>including infrastructure needs or<br>deficiencies including needs or<br>deficiencies related to sewers, municipal<br>and industrial water, and structural fire<br>protection in any disadvantaged,<br>unincorporated communities within or<br>contiguous to the sphere of influence | The District relies on a volunteer labor force.<br>There are currently no plans for new<br>stations. The District has indicated that both<br>of its stations are currently in good<br>condition. The District is currently meeting<br>the needs of the community. The District<br>provides fire protection related services.<br>Sewer, water and other municipal services<br>are provided by either private means or<br>other Districts.                       |
| 4. | Financial ability of agencies to provide services  | The District's per capita revenues are below<br>the regional median. In 2015, property<br>owners within the district overwhelmingly<br>approved a special assessment. This<br>increased revenue has contributed to<br>firefighting training, fire station maintenance,<br>equipment repairs, and administrative<br>support. The District is currently collecting<br>development fees and has explored<br>requiring a charge for vehicle accident<br>responses. |
| 5. | Status of, and opportunities for, shared facilities  | The District could benefit from shared<br>support service provided by a Joint Powers<br>Authority. The District currently does not<br>maintain any mutual aid agreements or<br>automatic aid agreements. has stated<br>interest in working closer with the City of<br>Modesto in areas that are surrounded by the<br>City already (islands).   |

| 6. | Accountability for community service<br>needs, including governmental structure<br>and operational efficiencies | The District is governed by a Board of<br>Directors comprised of 5 members. Each<br>Board Member is appointed by the Board of<br>Supervisors and serve a three-year term,<br>with a two-term limitation. |
|----|---|--|
| 7. | Any other matter related to effective or<br>efficient service delivery, as required by<br>Commission policy     | None at this time.   |

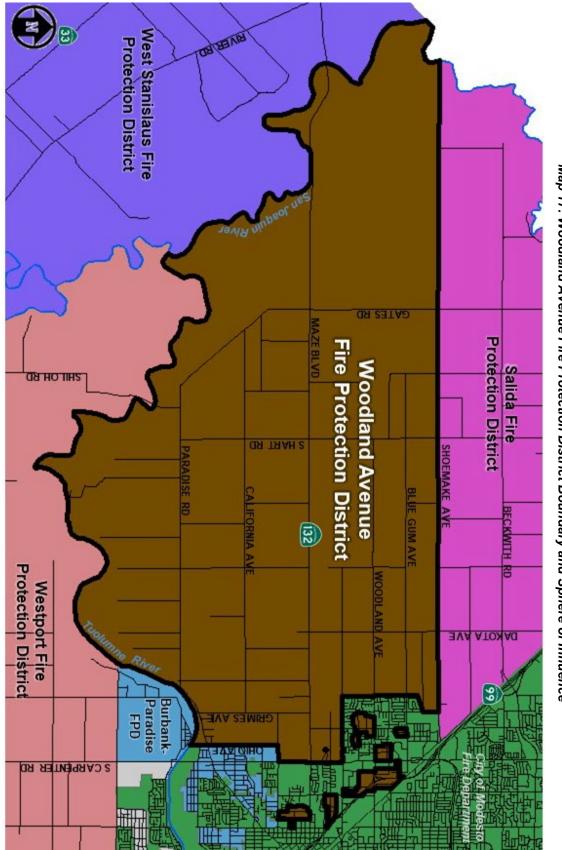

#### SPHERE OF INFLUENCE UPDATE DETERMINATIONS AND RECOMMENDATIONS WOODLAND AVENUE FIRE PROTECTION DISTRICT

| i  |  |   |
|----|--|---|
|    | FACTORS TO BE ADDRESSED  | DETERMINATION   |
| 1. | The present and planned land uses in the area, including agricultural and open-space lands   | The current area of the Woodland Avenue<br>Fire Protection District is approximately<br>28,521 acres and is generally located<br>between the Tuolumne River to the south and<br>west and Shoemake Avenue to the north.<br>The easterly portion of the District is within<br>the City of Modesto's SOI. Land uses within<br>the district include agricultural and vacant<br>land, with residential and industrial uses<br>within the City's SOI. There are no changes<br>in the planned land uses in the District as a<br>result of this review. |
| 2. | Present and probable need for public facilities and services in the area   | Based on present and planned land uses,<br>there is a continued need for services in the<br>area. Until such time as the City of Modesto<br>annexes the lands within the District, services<br>will continue to be needed at the current<br>demand. Annexation of the area and<br>intensity of land use in the area may increase<br>calls and workload. Due to the District's<br>diminishing sphere, annexation would also<br>mean detachment from the District, leading<br>services to be provided by the City's fire<br>department.           |
| 3. | Present capacity of public facilities and<br>adequacy of public services that the<br>agency provides or is authorized to provide               | The MSR section provides a discussion of the services provided by the District, their present capacities, and infrastructure needs. The District currently relies on a volunteer labor force.   |
| 4. | The existence of any social or economic communities of interest in the area if the commission determines that they are relevant to the agency. | There are no known communities of interest<br>in the area. However, it should be noted that<br>there are six smaller areas of the District that<br>are entirely surrounded by the City of<br>Modesto.   |

| 5. | For an update of a sphere of influence of a<br>city or special district that provides public<br>facilities or services related to sewers,<br>municipal and industrial water, or structural<br>fire protection, the present and probable<br>need for those public facilities and services<br>of any disadvantaged unincorporated<br>communities within the existing sphere of | Portions of unincorporated West Modesto are<br>identified as Disadvantaged Unincorporated<br>Communities (DUCs) as defined in Section<br>56033.5 of the Cortese-Knox-Hertzberg Act<br>of 2000. One station within the District is not<br>currently up to contemporary standards for a<br>fire facility and needs to be replaced.<br>Additional services, such as sewer and water |
|----|--|--|
|    |  |  |

#### RECOMMENDATION

Pursuant to Government Code Section 56425(i)(2), the Commission does hereby establish the functions and classes of services provided by the Woodland Fire Protection District (FPD) as those specified in the California Health & Safety Code §13862. Based upon the information contained in this document, it is recommended that the Woodland FPD Sphere of Influence be updated to affirm its current sphere, as shown on Map 17.
